Terra Air.

New.

New.

New.

Terra Air.

This terrarium is made of mesh, making it perfect for animals that require plenty of ventilation. It's also ideal as a temporary outdoor enclosure to allow animals to experience natural sunlight (UV!) during warmer days.

Easy-to-assemble terrarium made of mesh and a tubular frame. The PVC insert in the bottom makes it easy to clean and/or allows for the use of a substrate.

Perfect as a summer residence for chameleons, for example, or as a permanent residence for non-gnawing insects.

Dimensions: 76x42x122cm, accessible via a zippered opening. Includes a PVC base.

Mounting material.

For building and decorating a durable and natural-looking terrarium, the right mounting and fixing materials are essential. Scaper foam is a black UV-resistant foam, perfect for creating background walls and securing wood and rocks. The Fix & Seal kit provides strong bonding and sealing, even on materials such as PVC where other sealants do not work. The black Silico sealant is ideal for terrarium construction, but also perfect for spreading over a surface and pressing coconut fiber or moss into it for a natural finish. For detailed and precise work, super glue is available, with the gel variant being especially suitable for fixing plants, moss, and small decorations.

Repto Terra Endura.

The Repto Endura terrariums not only have a modern design, they are extremely durable and offer your animals the space they need to stay healthy and to always find a nice place to stay.

This terrarium is made of PVC. Unlike wood, PVC is not sensitive for water or humidity. Also PVC isolates better than glass.

The subtle ventilation at the front ensures good air exchange in the terrarium. The mesh panel at the top allows easy installation of lighting and heating.

Habistat Mesh panel set 2 pcs.

The HabiStat mesh panels are an optional accessory for the HabiStat Flat pack terrariums. You easily replace the small glass panel on one or both sides of your terrarium.

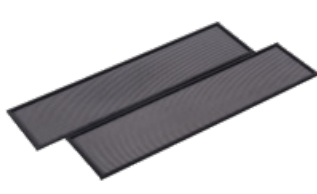

These mesh panels provide additional airflow and exchange in your HabiStat terrarium, making it easier to control temperature and humidity.

Perfectly applicable for animals that require more airflow like many Chameleons or to prevent condensation in very humid terrariums, for example.

Standard Vivarium Black.

This terrarium is ideal for desert and steppe animals in a drier environment. Using wood instead of glass retains heat much better and makes it much easier to mount lights in the terrarium. You can stack these terrariums or choose the matching cabinet.

This spacious terrarium is ideal for somewhat larger lizards and snakes. Perfect for the Bearded Dragon!

By using wood and cross ventilation, heat loss is significantly reduced.

The HabiStat Vivarium is made of 18 mm thick melanin and tempered glass for increased durability. Supplied as a kit.

Tortoise Table.

The HabiStat Turtle Table provides a table-top enclosure for a tortoise with a spacious open and a sleeping area. The spacious entrance to the covered area allows this enclosure to be used for a longer period of time as the animal grows. Tortoises often see glass walls very poorly and frequently bump themselves. Using the closed walls prevents this. Because the top is open, you still have the perfect interaction with your animal.

Use the HabiStat land tortoise table to easily create the perfect enclosure for land tortoises

The sleeping area has an easy-to-open lid and space for a heat mat. This is the perfect place to create a humid environment which has a positive effect on shield development.

Size L109xD61xH63cm. Combine with the HabiStat land tortoise kit to complete your enclosure.

Halogen Heat Lamp.

Arcadia Reptile Halogen Flood lamps are powerful, bright and Infrared-A rich. They are highly energy-efficient because they are better reflected and insulated than standard glass lamps. This allows them to deliver high levels of heat and visible light. The Arcadia Reptile Halogen Flood lamp has a built-in metal reflector for optimal light delivery to the basking area. Arcadia Reptile Halogen Flood Lamps are powerful and robust and are best used with a suitable dimming thermostat.

HEAT/LIGHT

These high quality spotlights have a built-in reflector and thicker glass. As a result, they last 2.5 to 3 times as long and provide more heat than standard heat spots

Combine this heater with a Dimming thermostat to always offer the right temperature to your animal and avoid wasting energy.

For many reptiles, it is wise to combine this lamp with a lamp with UV-B output.

This spotlight produces a wide light and heat beam so your animal can "sunbathe" its entire body. Also produces UV-A which has a positive effect on well-being, reproduction and colour vision in many animals.

Combine this heat radiator with a Dimming thermostat to always offer the right temperature to your animal and avoid wasting energy.

For many reptiles, it is wise to combine this lamp with a lamp with UV-B output.

Solar Basking Spotlight.

The Arcadia Basking Solar Spotlight provides ambient heat to an enclosure in a compact beam of light. The lamp has an inviting warm colour and uses standard E27 fittings. Designed to provide good quality heat and can be used with a thermostatic controller.

This spotlight produces a compact light and heat beam and is therefore suitable for higher terrariums or places where you want to create an intense "sun spot". Also produces UV-A which has a positive effect on well-being, reproduction and colour vision in many animals.

Combine this heat radiator with a Dimming thermostat to always offer the right temperature to your animal and avoid wasting energy.

For many reptiles, it is wise to combine this lamp with a lamp with UV-B output.

Ceramic Heater.

The modern Arcadia Ceramic Heaters are ideal for heating enclosures for various animal species including reptiles. The heater reaches high temperatures and thus heats the surrounding air in the enclosure.

This ceramic heater provides plenty of heat and is ideal for warming the air in animal enclosures, such as terrariums. Can be used day and night as it does not emit light.

You can perfectly control the temperature by combining this heat source with the HabiStat Pulse Thermostat. For reptiles, this lamp can be perfectly combined with an Arcadia UV-B lamp.

Place this lamp in an E27 socket suitable for high temperatures. Always make sure that humans or animals cannot touch the lamp to prevent burning, therefore use a grid or lamp guard to prevent touching.

Deep Heat Projector.

The Arcadia Deep Heat Projector uses advanced technology to produce the most natural and effective wavelengths of infrared, namely infrared A and B. It supplies essential heat deep inside the body safely and naturally as a usable flood, maintaining a set thermogradient.

HEAT

This heater emits heat like the sun, namely infrared A and B. This radiation heats the animal much better, deep into the tissue, compared to the commonly used infrared C heater. As this heater does not emit light, it can be used both at night and during the day.

Combine this heat radiator with a Dimming thermostat and an Arcadia UV-B lamp for a perfect and energy-efficient solar spot for your reptile.

Place this lamp in an E27 socket suitable for high temperatures. Always make sure that humans or animals cannot touch the lamp to prevent burning, therefore use a grid or lamp guard to prevent touching.

Solar Basking Infrared Spotlight.

The Arcadia Infrared heat lamp is a glass E27 bulb with wide red radiation. This lamp is designed to heat the enclosure with little noticeable visible light. It is advisable to use natural slate or something similar under the heat source to naturally store heat during the day and release it in the evening. This promotes stabilisation of the enclosure temperature not only during the day, but also at night if necessary.

This infrared lamp is designed to heat the enclosure with little noticeable light.

Combine this heat radiator with a Dimming thermostat to always offer the right temperature to your animal and avoid wasting energy.

Does not give UV-A or B so for many reptiles it is wise to combine this bulb with a UV-A and B bulb.

Arcadia 2nd Generation UV Basking Lamp.

The D3 UV Basking lamp is a high-quality lamp that delivers UVB, UVA, visible light and heat from a single bulb. As in nature, animals experience intense heat and UV radiation under this spotlight. The lamp has an integrated ballast and therefore does not require any ballasts.

Due to its size, this lamp is perfect for large or open enclosures. Commonly used for Turtles and Tortoises and for other larger reptiles.

Hang the lamps at a sufficient distance from the animal and always ensure that the animal can escape the radiation of this lamp to self-regulate its temperature and UV-B needs

D3 Lamp Holder with Barcket.

Arcadia Ceramic Lamp Holder Plus Bracket is a high-quality horizontal lamp holder with bracket and switch.

Easy-to-screw holder for horizontal placement of compact lamps.

Modern compact lamps like Arcadia's have a design which has a higher efficiency when mounted horizontally.

Ceramic E27 fitting resistant to higher temperatures, easy-to-screw bracket and off switch in the cable.

Repto light Stand adhesive.

This adhesive Repto light stand is easy to use and can be perfectly combined with the Repto Dome.

This light stand can easily be glued to any terrarium on one side or on the back.

By sliding the rod in the holder you can adjust the height and thus adjust the distance from the lamp to the terrarium for the desired temperature.

Size: 18x48cm. Comes with clips to guide the cable.

Repto Light stand 180cm.

The Repto light stand is super flexible in use and can be perfectly combined with the Repto Dome. Its versatile adjustment options allow it to stand either on the ground or on a table next to the terrarium.

This stand features a robotic arm with hook to solidly attach a light dome like the Repto dome 14 of 21cm.

The stand includes a solid floor plate with a 4-piece bar that can easily be used at various heights by using a firm screw connection.

Hook height adjustable from 40 to 180cm. Base plate 32x19cm. Black colour.

Heat Lamp Cage.

This safety cage ensures the animals are shielded from the heat source and is easy to mount over the lamp.

This cage to shield heat lamps is deeper and wider than most alternatives and therefore suitable for many lamp types. Easy to open at the bottom to change the lamp.

Always use a heat cage if the heat lamp is in the animal's enclosure to protect both the lamp and the animal.

Height 220mm, diameter 120mm. Suitable for very many lamps including ceramic

Jungle Dawn Led Bar.

This efficient LED lighting provides high light intensity with natural colours and is perfect for both a tropical and desert terrarium. The terrarium is much more beautifully lit, making furnishings and animals and plants much more alive. The wide flood provides even light, no pin spots, no 'purple tint' from separate red and blue diodes.

Animals like this lighting because in nature they are often also used to the powerful "sun". Plants appreciate the high PAR value of this lamp. The PAR value is important for photosynthesis in the plant and therefore directly affects plant growth.

You can perfectly interconnect and/or combine these LED bars with the Arcadia proT5 (UV-B) lamps, using the included link cable you can connect up to 10 units to 1 socket.

T5 Mini Set Shadedweller.

The Arcadia T5 UVB ShadeDweller kit is ideal for providing your enclosure with light, UV-A and UV-B radiation. UV-B radiation in particular is essential for reptiles' health.

T5 lamps are the best method of offering UV radiation to your reptiles. The electronics make these bulbs flicker-free unlike normal fluorescent tubes, the compact design makes this bulb easy to mount.

Extremely suitable for many snake species or for lizards in smaller enclosures, for example. You can easily interconnect up to 10 kits using the link cable provided.

Includes fixture, reflector and 7% T5 UVB ShadeDweller Lamp. These lamps give 12 months of stable UV output over a much wider area than spot lamps.

Lighting

This easy-to-use kit can easily be attached to an enclosure, rest on a mesh terrarium, hung above an enclosure or hung indoors (where it can be done safely). The slim design and specially curved reflector mean you take up less space, but still project as much light forward as possible.

Pro T5 Set Forest.

Lighting for an average UV-B requirement like many animals found in the tropical rainforest. Combine with a heat source such as the Arcadia "Deep heat projector" or halogen spotlight for the perfect sun spot.

Pro T5 Set Desert.

Lighting for animals with higher UV-B requirements or in larger enclosures. Combine with a heat source such as the Arcadia "Deep heat projector" or halogen spotlight for the perfect sun spot.

Pro T5 Set Dragon.

Lighting for animals with high UV-B requirements or in larger enclosures. Combine with a heat source such as the Arcadia "Deep heat projector" or halogen spotlight for the perfect sun spot.

ThermalZoo Pro.

ThermalZoo Pro Twin.

The Thermalzoo is a light unit especially for larger enclosures. Made of coated aluminium, this high-quality fixture is rust-proof, strong and very light. The heating lamps operate via separately switched high-quality cage lamp fittings. This protects the lamps and allows dimming thermostats to be used for each channel.

This set allows heat and UV-B to be efficiently combined in one large sun zone. The elegant housing is perfect for large enclosures for tortoises, caimans, and large lizards.

For reptiles, it is important that they can warm up their entire body simultaneously and that UV-B radiation and heat come together in this spot. This is often lacking for larger animals. ThermalZooPro allows you to link units together, creating wider sun zones.

This Fixture includes an aluminium housing with 4 point mounting system, 2 ProT5 24w 6% forest lamps, a solar basking spot flood light 100w and a Deep heat projector 50w.

Smart App lighting.

LumenIZE Jungle LED Bar.

Controllable with an app, this efficient LED light offers high light intensity with natural colours. Perfect for both a tropical and desert terrarium. The terrarium is much more beautifully lightened, making the decoration, animals and plants much more alive. The wide flood provides even light, no pin spots, no 'purple tint' from separate red and blue diodes

Animals like this lighting because in nature they are often used to the powerful "sun" as well. Plants appreciate the high PAR value of this lamp. The PAR value is important for photosynthesis in the plant and thus directly affects plant growth. In this LumenIZE version, the course and amount of light can be precisely controlled via the freely available LumenIZE app. This way, you can simulate the sun perfectly from sunrise to sunset.

You can perfectly interconnect and/or combine these LED bars with the Arcadia LumenIZE proT5 (UV-B) lamps, use the optionally available cable.

Length 290MM, power 18W. The efficient heat sink extends the life of the high-output LEDs. Easy to control with the free LumenIZE app, available for Apple and Android.

LumenIZE T5 UVB ShadeDweller.

The Arcadia LumenIZE T5 UVB ShadeDweller Max kit is ideal for providing your enclosure with light, UV-A and UV-B radiation. UV-B radiation in particular is essential for the health of reptiles. The ShadeDweller max is often recommended for animals that do not have a high UV requirement but would benefit from it such as royal pythons.

T5 lamps are the best method of offering UV radiation to your reptiles. They offer a more even build-up of light and UV over a larger area than spot lamps.

By using the LumenIZE App, you can set the light and UV intensity and simulate a realistic progression of the day.

Contains fixture, reflector and 2.5% T5 UVB ShadeDweller max 14w Lamp. These lamps give 12 months of stable UV output. Length 600mm

Lamp Guard Pro.

An innovative and easy-to-use UV lamp cage system designed to protect animals and lamps, while allowing as much light and UV through as possible. Perfect for the Arcadia LumenIZE ProT5 or the Jungle Dawn LED bar.

Easy-to-mount protective cage for elongated lamps. Only 15% reduction in illumination, unlike many other protectors where up to 30% of light is lost

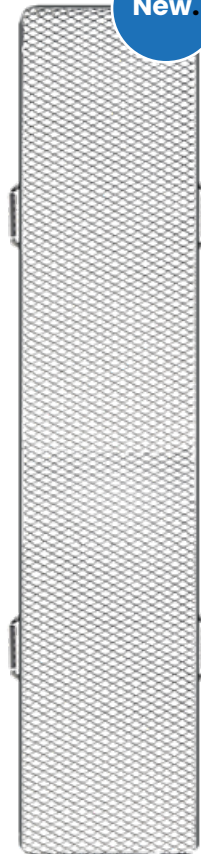

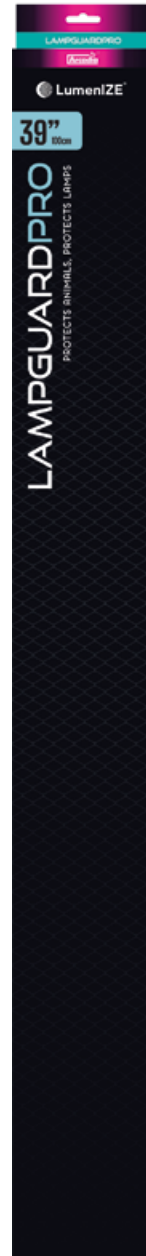

Integrated hinges and multiple cable entries make these protectors very easy to use

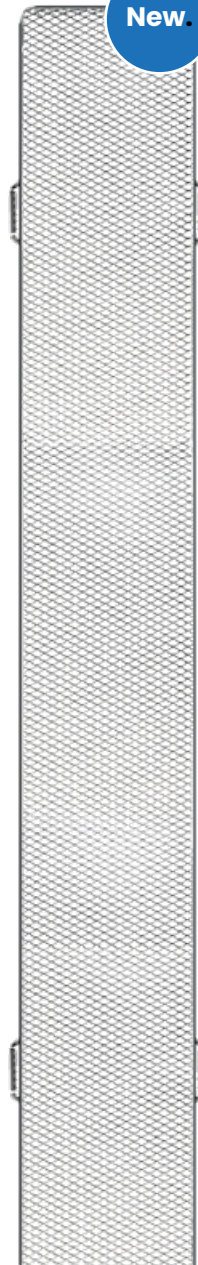

Flexible hinges allow for easy lamp change.

Lighting

D3 Forest.

These high-quality lamps provide a natural light spectrum including UV-A and UV-B. Offering UV-B is necessary for various processes in the body of reptiles such as the synthesis of vitamin D3.

This 6% UV-B lamp is suitable for reptiles with an average UV-B requirement from the tropical rainforest such as many day geckos, chameleons and iguanas

These quality lamps are made in Germany and give 12 months of stable UV-B output

Suitable for reptiles requiring medium levels of UV-B such as Day Geckos, Iguanas, Chameleons and Water Dragons.

description
6% UV-B content to support forest reptile species synthesis of vitamin D3.

ShadeDweller.

These high-quality lamps provide a natural light spectrum including UV-A and UV-B. Offering UV-B is necessary for various processes in the body of reptiles such as the synthesis of vitamin D3.

The ShadeDweller is perfect for many screen and night animals with lower UV-B requirements, such as leopard or eyelash geckos. These animals also expose themselves during the day to capture enough radiation.

These quality lamps are made in Germany and give 12 months of stable UV-B output

Perfect for use with crepuscular species including the Leopard Gecko, Crested Gecko, many Amphibians and Inverts. Also many diurnal species of snake that can easily climb to regulate their own level of exposure in shallow vivaria such as Corn, King, Milk and Rat Snakes.

description

T5 lamp specifically designed for Shade Dwelling (crepuscular) species whilst also being suitable for many diurnal species living in shallow enclosures.

features

- Produces a targeted flood of UV enabling the keeper to set a photo-gradient
- Full Spectrum lamp

Arcadia Puresun Compact Lamp Reflector Set.

Puresun compact lamp holder and reflector set. Birds see more than humans, in addition to the colours we see, birds also see UV-A. By offering UV-A, you complete birds' vision, which has a very positive effect on behaviour, reproduction and well-being of your bird(s).

Birds see at a much higher frequency than humans, which is why Arcadia chooses high-quality flicker-free electronics. Many ordinary lamps flicker at a huge frequency in birds' eyes.

In addition to UV-A, this lamp also emits UV-B, this radiation is essential for animals that cannot receive direct unfiltered natural sunlight. UV-B is essential for various processes in the bird's body, such as the production of vitamin D3 and the absorption of calcium

Lamp holder with E27 fitting and reflector. Includes compact lamp 20w with E27 socket and efficient "triple U" design. Change bulb every 12 months for best results.

Bird Lamp.

This Arcadia Bird replacement 2.4% UV-B specialised bird lamp will contribute to fantastic colour vision in indoor pet birds and enable them to produce their own Vitamin D3 naturally.

This sleek lamp is flicker-free when used with Arcadia bird fixtures and full -spectrum+UV-B. These lamps have a high CRI and are UV-B powerful for full-year use. Providing an artificial source of UV light is often overlooked when keeping birds. These lamps are designed to emit 12% UVA and 2.4% UVB. This promotes optimal vitamin D3 synthesis and colour vision. This promotes natural behaviour, increases mineral uptake, storage and utilisation and improves captive breeding.

Birds see a much higher frequency than humans, which is why Arcadia chooses high-quality flicker-free electronics. Ordinary fluorescent lights flash at a huge frequency in birds' eyes.

In addition to UV-A, this lamp also emits UV-B, this radiation is essential for animals that cannot receive direct unfiltered natural sunlight. UV-B is essential for various processes in the bird's body, such as the production of vitamin D3 and the absorption of calcium

Bird lamp T5 2,4% UVB.

T5 replacement lamp for existing fixture. Birds see more than humans; in addition to the colours we see, birds also see UV-A. By offering UV-A, you complete birds' vision, which has a very positive effect on the behaviour, reproduction and well-being of your bird(s).

Humidification technology.

Humidifier + digital timer.

The HabiStat Humidifier is ideal for humidifying your terrarium with a realistic cloud of mist. Easy to set with digital LED touch buttons and because of its large 4-litre reservoir it does not need to be refilled often with average use.

Research shows that humidity is one of the most important elements for the right climate in your animal's environment. With this device, you can easily create the right humidity by setting a cycle to suit your animal's needs.

Combine with the HabiStat Dual outlet. With this splitter, you can supply two terrariums with fog simultaneously or, in a large terrarium, distribute the fog in two places in the enclosure.

Working time: 2-120 minutes, maximum output of 300 ml/h, cycle time: 0-4 hours, reservoir capacity 4 litres.

1h till 30 days

Usage	44,5 Watt
Pressure	4,8 bar = 0,48 MPA
Pump capacity	13,4 L/h

Includes four 360 degree adjustable spray nozzles (expandable to ten) and tube

Easy to refill without opening the water reservoir

Repto Rainmaker 8500.

A rain device has several functions in a terrarium. Spraying the terrarium automatically not only increases humidity but also ensures good plant growth. In addition, many -especially tree-dwelling animals like the drops better than drinking from a water tank.

This powerful rainmaker is equipped with a large reservoir and capable of supplying very large or several terraria with 'rain' at the same time. Easy to set with 3 buttons: Spray time, spray cycle and manual spray.

This rainmaker features a large 8500ml reservoir and therefore, even when water demand is high, does not need to be refilled often. The filling valve makes filling easy without having to open the whole lid.

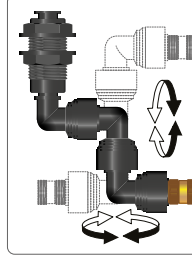

Spray time adjustable from 1 second to 2 minutes. Interval time from 1 hour to 30 days. Supplied with 4 nozzles and hose. Expandable up to 10 nozzles. The 360-degree rotating nozzles have metal heads and can be mounted with suction cup or pass-through screw connection.

Pulse Thermostat.

The HabiStat Classic Pro Range is the perfect choice for anyone looking for a reliable, easy-to-use, wide-range thermostat that can regulate up to 50C. The HabiStat Classic Pro Pulse Proportional Thermostat continuously pulses electricity to the heater, resulting in constant and very precisely regulated heat. A normal thermostat puts the heater on full power until the set temperature is reached. It then turns the heater off completely until the temperature drops below the set point, after which the cycle starts again.

The HabiStat Classic Pro Pulse Proportional Thermostat continuously pulses electricity according to the amount of energy requested. This makes it capable of precisely controlling the temperature and ideal for ceramic lamps, for example.

Very easy to operate, place the sensor in the desired location and turn the knob to the desired temperature

Range 0-50C, Detachable probe, LCD display, Protected with fast fuse, Over and under temperature alarm, Maximum load capacity up to 450 watts.

Digital Dimming Thermostat.

Suitable for most heat sources, the Digital Dimming Day/Night Thermostat and Timer ensures a constant temperature instead of a hot/cold cycle. Day and night temperatures can be set separately and the thermostat continuously indicates the current temperature and time. A revolutionary power meter continuously indicates the % power of the heater.

3 in 1, this thermostat is a dimming thermostat, digital thermometer and digital timer in one device! Contains two separate timed circuits to switch heater, lights, fans or sprinkler systems on and off twice every 24 hours.

By using a thermostat, you will always have the right temperature for your animal and avoid wasting energy. Changing or turning off lights in different seasons is a thing of the past. Both upper and lower temperature limits can be set with an alarm notification.

Range from 0 - 50°C, equipped with day and night setting, also a 2nd socket which you can switch with separate timer for e.g. a sprinkler system, lighting etc. Maximum 600w load capacity, accurate to 0.1°C. The device does not lose its memory settings when the power is switched off.

€124,99

Digital Temperature Thermostat.

The Digital Temperature Thermostat is an off thermostat designed to give a continuous readout of the current temperature and time. The off temperature cycle can be set between 0.1 °C and 5 °C and both upper and lower temperature limits can be set. Included is a separate time circuit that can be used to switch heater, lighting, fans or a sprinkler system on and off once every 24 hours. The unit does not lose memory settings when the power is switched off. Maximum 600 watts.

3 in 1, this thermostat is an off thermostat, digital thermometer and digital timer in one device! Contains two separate timed circuits to switch heater, lights, fans or sprinkler systems on and off twice every 24 hours.

By using a thermostat, you will always have the right temperature for your animal and avoid wasting energy. Both upper and lower temperature limits can be set with an alarm notification.

Range from 0 - 50°C, also a 2nd socket which you can switch with separate timer for e.g. a sprinkler system, lighting etc. Maximum 600w load capacity, accurate to 0.1°C. The device does not lose memory settings when the power is switched off.

Heat mat carbon printed.

HabiStat Heat Mats produce ultra long-wavelength infrared heat; this wavelength is invisible to the human eye and heats the surface it comes into contact with rather than the air. This heating effect is very similar to that of the sun and has the ability to heat anything it touches, but the air temperature remains much lower.

Heat mats imperceptibly provide gentle background heat and are ideal as a supplement or for maintaining night-time temperatures. Reptiles absorb this heat in a manner very similar to a natural environment.

Combine with the HabiStat MatStat thermostat for the right climate in your terrarium.

Earthmix.

EarthMix is a clean, safe-to-use, mineral-rich Bioactive substrate that, unlike other substrates available on the market, contains no non-natural particles that can lead to clogging. The right mix 'ratios' between 'Mineral' and 'Organic' help to support the "cl-up crew" such as springtails and woodlice used in Bio-Active systems.

This earth mix can be used for all species of Reptiles, Amphibians and Invertebrates and is ideal for tropical terrariums.

Its mix of minerals and organic matter makes it the perfect mix for micro-life and plants in a tropical terrarium.

If the soil becomes depleted, you can easily boost it again with the Arcadia Revitaliser.

Earthmix Arid.

EarthMix is a clean, safe-to-use, mineral-rich Bioactive substrate that, unlike other substrates available on the market, contains no non-natural particles that can lead to clogging. The right mix 'ratios' between 'Mineral' and 'Organic' help to support the "cl-up crew" such as springtails and woodlice used in Bio-Active systems.

This earth mix can be used for all types of Reptiles, Amphibians and Invertebrates and this Arid version is ideal if it is allowed to get a little drier

Its mix of minerals and organic matter makes it the perfect mix for micro-life and plants in a tropical terrarium.

The "Arid" version contains 2x as much volcanic rock and therefore holds slightly less moisture than the normal version. This makes it suitable for drier environments.

Reptile Deco.

Many animals need or benefit from a more humid spot in the terrarium. A shelter can, for example, be provided with moss or moisture-retaining substrate to meet this need.

Providing sufficient hiding places gives animals a sense of security this reduces stress. Animals often become more active and show themselves more often if their favourite hiding place is nearby

Deco Branch.

Branches are the ideal terrarium decoration in many cases. They offer plenty of climbing and sliding opportunities and are also extremely decorative.

The advantage of plastic is that it is easy to clean, extremely durable and guaranteed pest-free.

This decorative plastic branch offers plenty of climbing opportunities.

Leaflitter Mulch.

HabiStat leaf litter mulch consists of mixed crushed leaves, ideal for covering substrate, feeding microorganisms and retaining valuable microclimates. Adding HabiStat leaf litter to an enclosure provides valuable food and shelter for many clean-up insects. They will happily eat these decomposed leaves and introduce these vital nutrients into the soil, supporting plant growth and life.

Litter of mixed and crushed leaves to sprinkle over the substrate. This litter protects the soil and supports micro-life.

The litter slowly decomposes, thus feeding and protecting the earth. Ideal for Bio-active set-ups, get close to nature!

This mix is ideal for creating a bioactive setup, as it will allow the clean-up crew and other invertebrates places to hide as well as items to eat, which in turn will all feed back vital nutrients into the substrate to sustain plant life and growth.

Adding leaf litter helps create multiple microclimates while simultaneously keeping the substrate healthier; it also helps keep the substrate humid or dry depending on the biome you wish to replicate. It's perfect for reptiles, invertebrates, and amphibians. It can also be used as a great food source for invertebrate species like beetles, isopods, and millipedes.

Leaflitter Mix.

HabiStat Leaf Litter is perfect to replicate the undergrowth of fallen leaves found in the wild, being made of a wide mix of leaves it gives a distinct and natural look in any enclosure allowing animals a much more natural experience within their homes.

HabiStat leaves are 100% natural so make an ideal choice for finishing off any enclosure build. They replicate the larger, more standout leaves in the under canopy, holding pockets of water to allow smaller species to drink as well as adding cover, food and homes for custodians. These leaves will really bring out the best in species that dig and forage amongst leaf litter in search of food and water.

In nature, these large leaves form the top layer of the soil, providing plenty of shelter and hiding places for both kept animals and micro life.

Adding HabiStat leaves brings the aesthetics of any ecosystem to life and invites a true representation of the natural environment.

Hikari Reptile food.

Hikari offers special food for the finest reptiles and turtles. The difference is obvious! An award-winning range of reptile foods, each with unique properties that make it easily accepted by the reptile for which it was developed.

Aquatic turtles need very little food. These omnivores, unfortunately, often get too much to eat. Hikari has therefore developed feeds for most aquatic turtle species. These precisely meet their specific eating habits and food requirements.

Turtle Sticks.

Hikari Turtle Sticks is a mix of three coloured sticks, each with a specific purpose. The yellow sticks ensure healthy growth. Proteins, minerals and multi-vitamins keep turtles in top condition. The green stick contains a large amount of Calcium and lactic acid which ensures stronger shell construction. The red stick contains chitosan, extracted from crustacs, which activates metabolism and ensures elastic skin.

Feed once or twice a day the amount your turtle can fully eat in 2-3 minutes. Make sure not to overfeed and always remove excess food to avoid unnecessary contamination.

A scientifically formulated daily diet for aquatic turtles with a tasty nutrient mix that aquatic turtles love.

Easily digestible, preventing potential water quality and odour problems. Absorbs water quickly and softens quickly while retaining its original shape. This allows the turtle to fully absorb the food.

Mulberific Delite.

Hikari Mulberific Delite is a scientifically formulated food enriched with Hikari-Germ probiotic bacteria for terrestrial turtles and herbivorous lizards. The unique formula with large amounts of vegetables and vegetable matter makes an ideal substitute for wild grass.

The pellet offers excellent water absorption and retains it well. This, combined with a unique spongy texture that greatly improves acceptance, ensures that tortoises get enough moisture.

Soak the pellets in fresh water for 5 minutes before feeding. It will then become 4x heavier and take on the desired texture.

S.R.P.
€53,99

In the wild, most tortoises eat only wild grasses, while as pets they are often fed vegetables and fruit. Feed that does not resemble the natural diet in composition and properties, which can cause urinary tract problems and shell deformities. Hikari Mulberific Delite is a scientifically formulated food enriched with Hikari-Germ probiotic bacteria for tortoises and herbivorous lizards. The unique formula with large amounts of vegetables and vegetable matter makes an ideal substitute for wild grass.

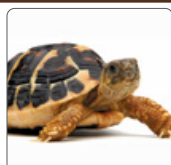

Nutritional advice.

- 1: Soak the pellets in a bowl with sufficient fresh tap water for at least 5 minutes before feeding.
- 2: The granules absorb water quickly, making them four times as heavy.
- 3: Hikari Mulberific Delite is intended as an exclusive food, it can be combined with, for example, vegetables or fruit, but this affects the precisely tailored nutritional profile of Mulberific Delite.

Leopa Gel.

Hikari Reptile Leopa Gel contains all necessary nutrients, vitamins, amino acids and trace elements and is specially formulated for insectivorous lizards, such as the Leopard Gecko. It is also an excellent supplement for omnivorous animals such as Bearded Dragons or Eyelash Geckos.

The formula developed in the Hikari lab is very well accepted and contains the necessary nutrients for a long and healthy life of your lizard.

Scientifically developed and uniquely balanced ready-to-eat food. Soft, chewy paste for insect-eating lizards. No need to mix or blend, simply squeeze the food from the packet and feed.

If your pet does not readily accept LeopaGel, you can dangle it in front of its mouth and slowly move it back and forth. 1cm of LeopaGel provides the calories of 3 large crickets (2cm) but is a much better feed.

HIKARI LEOPAGEL 60 GRAM

A3020610

0042055206068

S.R.P.
€14,49

Hikari Reptile Leopa Gel is a scientifically formulated, uniquely balanced, ready-to-use paste feed in a special "Oxy-Stop" packaging. It contains all the necessary nutrients, vitamins, amino acids and trace elements for insectivorous geckos such as the leopard gecko, for example. But is also good for omnivorous lizards like the Crested gecko and the bearded dragon that eat vegetables, fruit, mice and other varied foods.

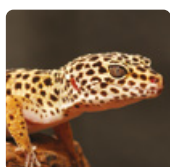

Nutritional advice.

- 1: The amount of Hikari Leopa Gel you should administer is approximately equal to half the width of the reptile's head.
- 2: Always remove remaining feed after feeding to avoid contamination or spoilage.
- 3: After opening, store refrigerated and use within about 30 days.
- 4: Never touch the feed with fingers, always use clean gloves and tweezers.

Leopa Delite.

The Hikari Leopa Delite is an ideal blend of ingredients in an easy-to-use and economical pellet. It contains the Hikari-Germ probiotics to support the immune system and digestion.

After moistening, the pellets take on a spongy texture that is attractive to lizards and resembles that texture of live insects. Due to its high palatability, the pellet is relatively easily accepted even by animals that would normally not readily grab a pellet.

Scientifically developed formula for insect-eating lizards such as Leopard Geckos, and smaller Teju and Monitor Lizards.

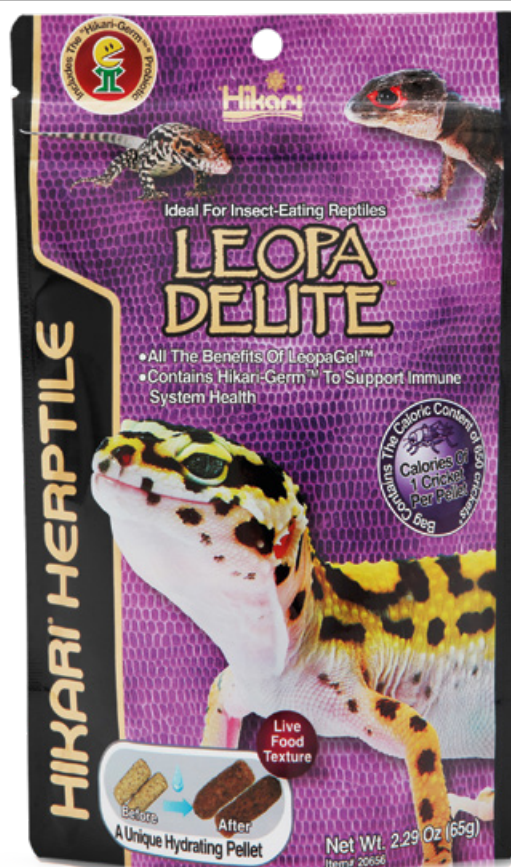

1 pellet contains about as many calories as 1 cricket of 2 cm. Soak the pellets in water for 3 to 5 minutes before feeding. For young animals daily and adult animals every 2-3 days.

Crest Gel.

Hikari Reptile Crest Gel contains all the necessary nutrients, vitamins, amino acids and trace elements for fruit and insect-eating geckos. Hikari Crest Gel is the ideal food for rhacodactyl geckos such as the eyelash gecko, rhacodactyl, giant gecko etc. It can also be used for other fruit- and insect-eating reptiles such as the day gecko.

Due to its rich mango and mealworm flavour, fruit and insect-eating geckos love this for. As a result, this food is very easily accepted.

This scientifically developed ready-to-use gel-like food has a perfect nutritional balance and the right texture and moisture even after it has been in the food bowl for an extended period of time.

If your pet does not accept CrestGel™ easily, use a spoon to place the food in front of its mouth. Feed late in the day at dusk for night active animals. We recommend feeding adult animals 3 gram every 2 or 3 days and babies 1 gram once a day.

Pac Attack.

The Hikari Pac attack is a unique balanced diet for South American horned frogs, also known as Pacman frogs. Its composition eliminates the need for multiple foods and prevents unpleasant odours.

A spongy stick designed to soften quickly when soaked in water, giving it the consistency of live food that most "Pacman" frogs love

Scientifically developed complete food for "Pacman" frogs.

The added calcium and uniquely balanced mix of nutrients eliminates the need for supplements and has a great benefit for the immune system.

HIKARI PAC ATTACK 40 GRAM

A3020447

042055193375

S.R.P.

€9,49

South American Horned Frogs have a remarkably large and broad head, and for good reason. They are voracious eaters, in the wild almost anything that moves is on the menu. Hikari Pac Attack is a spongy carnivore food with the right structure, enriched with Calcium and all necessary ingredients. Which makes supplementary feed unnecessary. It is easy to feed with a pipette. Submerged in water, the sticks quickly soften and can be kneaded together into one large ball. Hikari Pac Attack is also suitable for Pixie and Tomato frogs.

Nutritional advice.

- 1: Soak each pellet in fresh tap water for 2 seconds before feeding until the texture is one your frog prefers.
- 2: Feed for frogs from 3 to 5 cm every 3 days 0.5 to 1 stick
- 3: Feed frogs of 5 to 10 cm 3 to 5 sticks every week
- 4: For frogs larger than 10 cm, feed 5 to 12 sticks every 2 weeks

Habistat Reptile food & Care.

H2O Balls.

HabiStat H2O Balls are an insect hydration formula that provide a vital source of water for insects.

Place in a small bowl and replace daily.

HABISTAT H2O BALLS

R8100005

5 027407012172

S.R.P.
€1,59

H2O balls provide a solid form of moisture for insects without the risk of drowning, ideal for food animals.

Well-fed and hydrated insects not only live longer, they are also better nutrition for the animal that eats them.

Insecta Shot.

If you feed insects with nutrition and moisture, they will stay alive much longer and prevent them from losing nutritional value and moisture the longer they are in the container.

Place 5 to 10 grams in a low container and feed every one of moisture such as the H2O balls or fresh vegetables. Replace every 24 hours.

HABISTAT INSECTA SHOT

R8100040

5 027407013537

S.R.P.
€1,09

Easy jar of food for feeding insects. With this food, you will keep the feeding insects fresh and healthy for longer.

Well-fed and hydrated insects not only live longer, they also have better nutritional value.

Calcium Shot.

HabiStat Calci Shot, provides an additional source of calcium for your animal. For your animal to absorb calcium in its diet, it needs sufficient exposure to suitable UVB lighting or vitamin D3 in the diet or a combination of both.

Composition: 100% Calcium Carbonate. Not for human consumption. Avoid inhalation of dust. Keep out of reach of children.

HABISTAT CALCI SHOT

R8100010

5 027407014213

S.R.P.
€1,49

Calcium is essential for animals, especially feed insects have relatively low calcium levels. You can easily increase the calcium content by powdering them with Calcium shot.

Perfect to use in combination with the Calci dish for leopard geckos, for example, which will lick this up themselves if they need calcium.

Live Feeding Set.

HabiStat Livefood Care Pack offers the perfect solution to extend the life of your live food. This care pack is designed to nourish and hydrate your live food, keeping it fresh for longer. Not only does this benefit your live food, but you can be sure that your reptile is getting the best nutrition.

Consisting of one jar of HabiStat Insecta Shot (15g) and one jar of HabiStat H2O Balls (20g)

HABISTAT LIVEFOOD CARE PACK

R8100015

H2O balls provide a solid form of moisture for insects without the risk of drowning, combined with the insecta shot the ideal package for food animals.

Well-fed and hydrated insects not only live longer, they are also better nutrition for the animal that eats them.

Tortoise Food Meadow Mix.

This tortoise food is a good addition to the diet of tortoises. Young tortoises (up to 3 years old) should be fed every day and older tortoises every other day. Tortoises are grazers and will keep returning to the food source offered to them throughout the day.

This feed is part of a varied and balanced diet for Greek, Fourteen and most other tortoises, among others.

Do not worry if they do not eat all the food during their first meal, but monitor their daily intake. Make sure fresh water is always available for the tortoise, because contrary to popular belief, tortoises do drink water.

Arcadia Reptile food.

Earthpro Optimised 52 Tortoise Food.

Arcadia Optimised 52 consists of cubes, so-called "tiles" made from cold-pressed grasses and herbs. The cold pressing minimises the loss of nutrition, and the tiles are easy to dose. This feed is ideal to use as a base for your tortoise(s) up to 70% of their total diet. You can supplement the remaining 30% with fresh produce when available.

This food is very close to the natural diet of tortoises, making it an excellent basis for healthy nutrition.

Contains at least 52 varieties of cold-pressed EU-grown grasses and herbs as a base.

Earth Pro Calcium Pro Mg.

Arcadia Reptile EarthProCalciumPro-Mg is a revolutionary new blend of finely ground, high-quality Calcium and essential Magnesium. The proper supply of Magnesium is not only essential for the Calcium, Phosphorus and D3 cycle, but it is also responsible for maintaining and regulating positive neurological and muscular health. Arcadia Earth Pro Calcium Pro Mg is designed to be safely used in place of calcium sources alone. Changing your dietary cycle with a balanced intake of magnesium helps ensure strong, firm bones. Magnesium is stored in bones and helps regulate healthy storage of Calcium. It also works with biological enzymes to regulate nerve and muscle function, protein synthesis, blood pressure and blood sugar, and plays a very useful role in digestion. Magnesium is essential for life and until now it has been largely missing from the diet of many captive exotics.

Easy to sprinkle over food (animals) to add extra calcium and magnesium. Helps with strong bones, muscles and nervous system

For your animal to properly absorb calcium in its diet, it needs sufficient exposure to appropriate UVB lighting or vitamin D3 in the diet or a combination of both.

100% natural Ingredients: 90% Calcium carbonate, 10% Magnesium carbonate.

Day-old Chicks.

Day-old chicks are a well-known prey animal for various carnivores such as reptiles, birds of prey and mammals. Chickens are frequently bred for egg production. However, the just-born cockerels cannot be used for egg production and are therefore used as animal feed.

Chicks are a good and tasty supplement in a carnivore diet.

It is wise not to have a diet consisting only of chicks, but alternate them with, for example, mice and rats.

Arcadia EVORX.

Feeding mice and other whole animals isn't always pleasant for everyone. After years of research and testing, Arcadia has developed a frozen food that offers an excellent alternative. The food has a friendlier appearance yet is still highly attractive to many snake species. EvoRx reduces the risk of pathogens through a very clean production process and is naturally low in bacteria. EvoRx is standardized by weight, allowing caregivers to accurately monitor feeding amounts.

Arcadia EvoRx provides all the natural nutrients snakes need to thrive in a convenient, clean package that is easy to store and feed.

Optimized for commonly kept snakes such as rat snakes, king snakes, hognose snakes, and various species of boas. Also perfect for carnivorous or omnivorous lizards.

New.

This pack contains 10 sausage-shaped packets weighing 1 gram each, similar to a "pinkie" mouse.

ARCADIA EVORX PINK 1 GRAM 10X
