COLOMBO

Colombo.

For a successful aquarium.

The best brands for aquariums.

Aquatest Testlab Professional.

With the Colombo Testlab, you have all the Aquatest drip tests in one handy case, which is also economical. There are videos on our website showing how to perform the water test. This makes water testing very simple!

Visit www.colombo.nl and try it yourself!

Aquatest Testlab Professional.

Complete test kit to measure the 7 important freshwater aquarium water values. Contains professional drip tests for pH, GH, KH, NO2, NO3, NH3 & PO4. All supplied are in a handy plastic case.

The included test tubes and complete instructions for use make water testing very easy. In the case, you keep all tests together.

If one of the tests in the case runs out, you can use loose Colombo aqua tests as replacements.

With the Colombo Aqua testlab, you can test the 7 important water values 40 times, a total of 280 water tests!

COLOMBO AQUA TESTLAB PRO

Water values and maintenance.

Aqua Start.

Colombo Aqua Start binds heavy metals, chlorine and other toxic substances, making tap water suitable for your fish. Because Colombo Aqua Start also contains coagulants, it also improves the clarity of your aquarium.

For making tap water suitable when filling, starting up and changing your aquarium.

Aqua start contains colloids and vitamins to strengthen your fish's mucous membrane, thereby reducing the risk of disease.

Use: add 4 ml per 10 litres of water once when filling the aquarium, then at each water change add 4 ml per 10 litres to the fresh water only.

COLOMBO AQUA START 100 ML
A5010900

S.R.P. **€6,79**

COLOMBO AQUA START 250 ML
A5010903
8715897225406
S.R.P. **€14,19**

Bacto Start.

Colombo Bactostart contains live filter and cleaning bacteria for a quick start of your aquarium. These bacteria are essential for the biological balance in the aquarium and keep the water clean and healthy. The start-up of an aquarium takes around 6-8 weeks, with Colombo Bacto Start you will shorten this period and ensure optimal filter performance.

For a quick start-up of the aquarium filter in new aquariums, so you can place fish in the aquarium quicker. Administering bacteria is also important after a major cleaning or drug treatment.

Colombo Bacto Start works best in combination with Colombo Aqua Start. Aqua Start makes the water suitable for the fish. Bacto Start prowides the live bacteria.

Application: in new aquaria, add 10 ml of Bacto Start per 10 litres of water. In existing aquaria and after water changes, add 5 ml per 10 litres every week. Overdosage is not harmful and ensures faster results!

COLOMBO BACTO START 100 ML
A5010905
8715897225413
S.R.P. **€6,79**

COLOMBO BACTO START 250 ML
A5010907
8715897225420
S.R.P. **€14,19**

The start up of a new aquarium will take approximately 4 weeks.

Complete range of drip tests for freshwater aquariums. Tests available for pH - KH - GH - Ammonia - Nitrite - Nitrate - Phosphate. With the Quicktest strip you can test pH - KH - GH - Nitrite - Nitrate and Chlorine values. The tests are easy to use and provide a reliable measurement result. Whichever test you choose, regular testing of the water is essential to maintain your aquarium.

1. Fill the aquarium with water, add Aqua Start to the water and Bacto Start to the filter material.
2. After livestock has been added, a weekly water change of 20% needs to be made, add Aqua Start after every water change.
3. Check the ammonia and nitrite levels twice a week. Make an additional water change if these values are too high.

Pay attention to the values!

After approximately 14 days the ammonia levels will no longer rise, the ammonia test will indicate a value between 0 and 0,5 mg/l. The nitrite level can still become too high, in order to keep the nitrite level low, for the first fortnight do a weekly water change of 20% and add Aqua Start.

pH min.

Colombo pH Min lowers the acidity of the water. An incorrect pH level can be harmful to fish and plants, therefore test the pH level regularly and correct if necessary.

A stable pH value requires a correct KH of 6-10, therefore check the KH value first, and correct it if necessary with Colombo KH Plus before correcting the pH.

We recommend reducing pH by up to 1 unit per day.

Use: 1 ml pH-Min per 5 litres of aquarium water lowers the pH by about 1 unit depending on the KH. Repeat the next day if necessary.

COLOMBO pH MIN 100 ML

S.R.P. **€14,19**

KH plus.

Colombo KH Plus increases the carbonate hardness of the water, a correct KH between 6-10 DH is essential for safe and stable pH values. KH is a measure of the total amount of dissolved carbonates in the water. Test the water regularly and correct any values that are too low with Colombo KH Plus.

If the KH is too low, the pH can fluctuate rapidly, which is very harmful.

We recommend increasing the hardness by up to 2DH per day.

Use: 1 ml KH Plus per 5 litres of aquarium water increases the KH by 2 DH. Repeat the next day if necessary.

COLOMBO KH PLUS 100 ML
A5010935
8715897225512
S.R.P. **€6,79**

COLOMBO KH PLUS 250 ML
A5010937
8715897225529
S.R.P. **€14,19**

GH plus.

Colombo GH Plus increases the amount of minerals and salts in the water, these salts are needed for healthy fish and plants. The ideal value of GH is 8-12DH. Test the water regularly and correct any values that are too low with Colombo GH Plus.

Too low a GH level is bad for fish health and the growth of your plants.

We recommend increasing the hardness by up to 2DH per day.

Use: 1ml GH Plus per 5 litres of aquarium water increases the GH by 2 DH. Repeat the next day if necessary.

COLOMBO GH PLUS 100 ML

Good water quality is essential for a healthy aquarium. With the Colombo maintenance system the maintenance of your aquarium is made easy and simple. Make a 20% water change every fortnight and add Colombo Bacto Care according to the instructions on the packaging.

Aqua Care.

Colombo Aqua Care naturally keeps your aquarium clean and clear. The breakdown of nutrients such as nitrate and phosphate is stimulated in a biological way, thus improving and stabilising water quality. Colombo maintenance products are easy to use and environmentally friendly.

Maintenance product for a healthy aquarium, change 20% of the aquarium water every 2 weeks and add Aqua Care.

Use Aqua Care in combination with Colombo Bacto Care for optimal results. Test aquarium water monthly and correct if necessary.

Dosage: 1 ml per 5 litres of water every 2 weeks. After administration, the aquarium water will be cloudy for about 24 hours.

S.R.P. €6,79

Goldfish Care.

Use Colombo Goldfish care for healthy goldfish. Goldfish Care is a 100% natural salt enriched with vitamins, minerals and care ingredients, the ideal salt content for goldfish is 0.1%. The salts and additives in Goldfish Care maintain a healthy environment and prevent fish diseases.

For optimal results, follow the Colombo maintenance system and replace Bacto Care with Goldfish Care.

Colombo goldfish care is best dissolved in warm water and then distributed over the aquarium.

Contents 100 ml. Enough for over 100 litres. Use: When filling the aquarium, add 1 gram Goldfish care per litre of aquarium water once, then at each water change add 1 gram per litre of water to the fresh water only.

COLOMBO GOLDFISH CARE 100 ML
A5010920
8715897225475
S.R.P. **€6,79**

Black Water.

Colombo Black Water contains peat extracts, creating natural tropical water (so-called black water) like your fish are used to in their natural habitat. The bioactive substances and natural tannins and humic acids promote vitality, natural colouring and disease resistance of the fish. As a result, your fish will feel at home and display their natural behaviour.

Suitable for all freshwater fish such as discus and angelfish, catfish, Tetras or South American cichlids, and shrimps and crustaceans.

Colombo Black Water stabilises pH levels naturally and improves water quality. The natural peat extract colours the water slightly brownish, reducing light and algae growth.

Use: At the start, pump 1 x (2.5ML) per 10 litres of aquarium water, then repeat dosing every 2 weeks, adding 2.5 ML per 10 litres of fresh water with every water change.

COLOMBO BLACK WATER 250 ML
A5010919
8715897342585
S.R.P. **€13,39**

Algisin.

Algisin is effective against all types of algae in freshwater aquaria. By reducing nutrient uptake, among other things, algae can no longer grow and eventually die. Aquarium plants can absorb their nutrients through the aquarium bed and are thus spared

Colombo Algisin fights algae and ensures a crystal-clear aquarium!

Algisin is effective against all types of algae and contains no copper.

Dosage: 1 ml per 20 litres of water, with 100 ml 1000 litres can be treated twice. Always test the aquarium water first and correct if necessary before adding algaecide!

Aqua Salt.

Aqua Salt is an all-natural purified sea salt rich in minerals. Aqua Salt ensures a healthy environment in the water, thus preventing fish diseases. The use of Aqua Salt is especially important for live-bearing fish, goldfish and brackish water fish, but be careful with fish from South America as they thrive in very soft water.

Many fish thrive better in water low in salts; the ideal salinity level for assimilation of these fish is 0.1%.

Colombo Aqua Salt is best dissolved in warm water and then distributed over the aquarium.

Use: When filling the aquarium, add 1 g of Aqua Salt once per 1 litre of aquarium water, then at each water change add 1 g per 1 litre of water to the fresh water only.

Tropical Fish Food.

For feeding tropical fish a flake food and a pellet food available.

Both foods contain a well balanced composition based on the feeding needs of tropical fish. Both the flake food and the pellet food are well accepted and pollution of the water is minimised.

Colombo advises the use of Tropical pellets for daily nutrition of your tropical fish. Pellets contain more nutrients and pollute the water less compared to flake food.

Tropical Pellet composition:

mycoproteins, cereals, fish and fish derivatives, yeasts, oils and fats, derivatives of vegetable origin, minerals, algae (0.8% spirulina), fruits.

Tropical Flake composition:

Cereals, fish and fish derivatives, yeasts, mycoproteins, derivatives of vegetable origin, oils and fats, insects, molluscs and crustaceans (2.2% shrimp), algae (0.6% spirulina), minerals.

Tropical Pellet.

Colombo Tropical Pellet encourages beautiful colours and aids growth. The small pellet is suitable for almost all types of fish. Tropical pellet has a high acceptance rate and is eagerly eaten by fish.

Daily food for tropical fish, the small pellet ensures healthy growth and beautiful colours.

Tropical pellets have much more nutritional value and pollute the water much less than flake food.

Goldfish Food.

For goldfish in aquariums a flake food and a pellet food are available.

Both foods are adjusted to the feeding requirements of goldfish, which are very different compared to tropical fish.

Colombo advises to feed Goldfish pellets for the daily nutrition of goldfish.

Goldfish Pellet composition:

Cereals, yeasts, insects, fish and fish derivatives, derivatives of vegetable origin, mycoproteins, vegetables, molluscs and crustaceans (5% shrimp), oils and fats, algae.

Goldfish Flake composition:

Cereals, mycoproteins, fish and fish derivatives, yeasts,oils and fats, derivatives of vegetable origin, molluscs and crustaceans (1.8% shrimp), sugars.

Goldfish Pellet.

Colombo Goldfish Pellet, sinking pellet food specially tailored to the specific nutritional needs of goldfish that differ substantially from tropical fish. Contains proteins, minerals, healthy fatty acids and antioxidants. This pellet food has a high acceptance rate and is eagerly eaten by fish.

Daily food for goldfish, the zinc-coated pellet ensures healthy growth and beautiful colours.

Goldfish pellets have much more nutritional value and pollute the water much less than flake food.

S.R.P.
€48,99

1000 ml is suitable for 1000 litres of aquarium water, overdosing does no harm, more bacteria means faster action.

Fresh PSB.

PSB bacteria prowide great water quality and more beautiful fish. These live PSB bacteria go straight to work in the aquarium and break down organic pollution. The strong smell of PSB is normal, this means the bacteria are alive!

Store in the fridge <6°C, shake well, suitable for freshwater and seawater.

PSB bacteria also contain many vitamins, minerals and amino acids that promote aquarium and fish health.

250 ml is suitable for 250 litres of aquarium water, overdosing does no harm, more bacteria means faster action.

Live Phytoplankton.

Live Phytoplankton forms the base of the ecosystem's food chain in your reef aquarium. Colombo Phytoplankton is cultured in saltwater in the Netherlands and is a natural food source for baptismal fonts, tubeworms and gorgonians.

Store in the fridge <6°C, shake well, suitable for freshwater and seawater.

Phytoplankton absorbs Nitrate and Phosphate reducing water values and prevents algae growth.

Dosage: Start with 1 ml per 50 litres daily for 2 weeks; then increase to 1 ml per 25 litres of aquarium water.

COLOMBO

Substrate, Fertilizer and CO_2 systems.

Colombo.

For beautiful aquarium plants.

Nutrient bases.

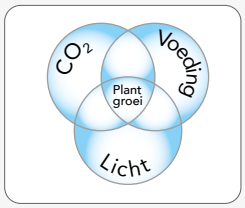

What is required for beautiful plants?

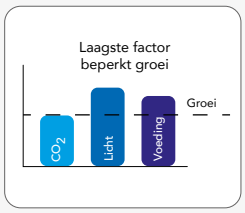

The following 3 factors must be in balance: light, CO_2 and nutrition. The factor that is least available in this 3-unit will limit plant growth and thus create room for algae growth.

1: Use modern LED lighting. This provides the plants with sufficient light. Pay attention to the PAR of the lighting! We recommend PAR > 200.

2: Supply CO_2 with a CO_2 system. Use a Colombo CO_2 indicator, then you can be sure you are adding the right amount of CO_2 and also avoid wasting CO_2.

3: Proper nutrition starts with a good nutrient bed when setting up an aquarium. However, the soil mainly releases nutrients to the roots and aquarium plants get much of their nutrition from the water. This is why you add liquid plant food to the aquarium water containing Nitro (nitrogen), Phospho (phosphorus) and Ferro (iron plus). If you keep these 3 groups in the right concentration in your aquarium, your plants will be able to grow optimally.

NutriBase.

Developed in collaboration with experts in growing plants, NutriBase contains all the necessary nutrients for healthy plant growth. Nutribase is the basic nutrient in the aquarium and should be covered with a top layer such as Mano Base or Flora Base Pro.

Complete substrate for aquarium plants, the open structure ensures good circulation in the aquarium bed

Added beneficial bacteria break down dirt and keep the substrate clean

Contents 5 litres, sufficient for a 5 cm layer in a 40x25 cm aquarium.

COLOMBO FLORA NUTRI BASE 5 L
A5010030
8715897164088
S.R.P. **€19,49**

ManoBase Red.

Colombo ManoBase is a natural substrate that can be used as a top layer in any aquarium, from beginner to specialist. Unlike solid gravel, ManoBase is open and light, both in terms of particles and structure. The open particles allow rapid and massive colonisation by beneficial bacteria, which are vital for water quality stability.

ManoBase is suitable for freshwater aquaria only.

ManoBase is available in two colours: red and black and in 5- or 10-litre bags. The diameter of the particles is 1-2 mm.

COLOMBO FLORA MANO BASE RED 5 L

FloraBase Pro.

Plant growth in 30 days with FloraBase soil:

Day 1

Day 30

pH regulating soil for fantastic plant growth.

When it comes to choosing the soil for your aquarium, Colombo has three products:
NutriBase, ManoBase and FloraBase Pro.
The right soil is the base for healthy plants and optimal plant growth!

FloraBase Pro.

FloraBase Pro is a unique aquarium soil produced in Japan. FloraBase lowers and stabilises the pH to 6. At this pH level, more CO_2 is naturally available for good plant growth. The CO_2 content of the water is very important for optimal plant growth. Many fish species such as Discus fish, species from South America and shrimps like a low pH of 6, these animals love FloraBase Pro! FloraBase Pro is recommended by experts!

Attention!
FloraBase PRO should not be washed before use, any cloudiness of the water is harmless and disappears after a few days.

Starting an aquarium is much easier with FloraBase Pro, the plants grow better due to the low pH and at a pH level below 7, you will not be bothered by toxic ammonia.

FloraBase Pro is rich in nutrients and its open structure ensures strong roots. The pellets do not disintegrate and retain their shape.

COLOMBO FLORA BASE PRO FINE 1 L
A5010080
8715897257438

Contents 10 litres, sufficient for a 5 cm layer in a 40x50 cm aquarium.

FloraGrow.

FloraGrow.

FloraGrow is a liquid plant food for normally planted aquariums. It supplies the water with the nutrients that plants absorb from the water through their leaves. It contains all necessary nutrients and a special iron additive that can be absorbed directly by the plant. Dose FloraGrow once a week.

Plant food for normally planted aquariums, with special iron addition.

Developed by plant experts, convenient dosing with hand pump.

COLOMBO FLORA GROW 250 ML
A5010100
8715897244063
S.R.P. €9,29

Contents: 250 ml is sufficient for 1250 litres of water. Dosage: pump once for 5 litres of aquarium water, dose weekly.

COLOMBO FLORA GROW 500 ML
A5010105
8715897244070
S.R.P. €15,29

Contents: 500 ml is sufficient for 2,500 litres of water. Dosage: pump once for 5 litres of aquarium water, dose weekly.

COLOMBO FLORA GROW XL 2.5 L
A5010110
8715897244087
S.R.P. €31,99

Contents: 2,500 ml is sufficient for 12,500 litres of water. Dosage: 10 ml per 50 litres of aquarium water, weekly dosage.

FloraGrow Carbo.

FloraGrow Carbo contains a substance that serves as a replacement for CO2. In aquaria without a CO2 system, the use of FloraGrow Carbo is indispensable. By adding FloraGrow Carbo, plants can absorb the alternative carbon source without having to administer CO2.

Liquid alternative to CO2, must be added daily for optimal results.

Besides its positive effect on plant growth, Carbo also helps reduce algae growth!

COLOMBO FLORA CARBO 250 ML
A5010130
8715897244124
S.R.P. €9,29

Contents: 250 ml is sufficient for 12500 litres of water. Dosage: pump once for 50 litres of aquarium water, dose daily.

COLOMBO FLORA CARBO 500 ML
A5010135
8715897244131
S.R.P. €15,29

Contents: 500 ml is sufficient for 25000 litres of water. Dosage: pump once for 50 litres of aquarium water, dose daily.

COLOMBO FLORA CARBO XL 2.5 L
A5010140
8715897244148
S.R.P. €34,49

Contents: 2500 ml is sufficient for 125,000 litres of water. Dosage: 1ml for 50 litres of aquarium water, dose daily.

FloraGrow Pro.

FloraGrow Pro is special liquid plant food for heavily planted aquaria, Flora Grow Pro was developed together with aquarium plant nursery Aquafleur and contains all important nutrients in a balanced composition plus nitrates and phosphates for brilliant plant growth.

Liquid foliar feed for heavily planted " scapers" aquariums with relatively few fish

In normally planted aquaria, sufficient nutrients are present because they are released from fish food and transformed in the filter. In aquaria with many plants, these substances are insufficient, in this case use FloraGrow Pro.

COLOMBO FLORA GROW PRO 250 ML
A5010115
8715897244094
S.R.P. €12,69

Contents: 250 ml is sufficient for 1250 litres of water. Dosage: pump once for 5 litres of aquarium water, dose weekly.

COLOMBO FLORA GROW PRO 500 ML
A5010120
8715897244100
S.R.P. €20,39

Contents: 500 ml is sufficient for 2,500 litres of water. Dosage: pump once for 5 litres of aquarium water, dose weekly.

COLOMBO FLORA GROW PRO XL 2.5 L
A5010125
8715897244117
S.R.P. €43,99

Contents: 2,500 ml is sufficient for 12,500 litres of water. Dosage: 10 ml per 50 litres of aquarium water, weekly dosage.

Root fertilisers.

Nutri Caps.

Nutri Caps allow you to introduce nutrition into the aquarium bed, directly at the roots where the plants need it. Plants take up nutrition via the leaves, but also via the soil, which is why sufficient nutrition in the soil is important, especially for plants with many roots such as Echinodorus etc.! Even if you start with a good nutrient medium, after a while the medium becomes poor in nutrients, Nutricaps offer the solution.

Fertiliser capsules for the aquarium base, prowides nutrition directly to the roots of the plants.

The Nutri Caps work with Osmocote which ensures a long-term regular release of nutrients for optimal plant growth.

Package contains 10 capsules. Once every 6 months, insert 1 capsule deep into the soil on large plants or use 1 capsule per 20 cm2 of soil surface.

COLOMBO FLORA NUTRI CAPS 10X
A5010145
8715897244155
S.R.P. €9,29

FE-Tabs (Iron Tablets).

FE tablets deliver iron to the roots, iron is the most important trace element for aquarium plants. Many plants absorb iron only through the roots, pressing the FE tablets into the soil enriches the nutrient medium with high-quality iron, for healthy and brilliant plant growth.

Iron capsules for the aquarium base, prowides iron nutrition directly to the roots of the plants.

Iron deficiency causes growth problems, especially Echinodorus, Cryptocoryne and red plants need extra iron.

Package contains 10 tablets: Use: every 6 months, insert 1 tablet per 10 cm2 of soil surface, deep into the soil, close to the roots of plants.

COLOMBO FLORA FE TABS 10X
A5010150
8715897243967
S.R.P. €10,29

COLOMBO

Plant NPF System

You take good care of your aquarium plants and regularly apply plant food. But which nutrients do your plants really use? This is different in every aquarium. That's why Colombo has developed the Plant NPF System!

By testing, you will know exactly which nutrients are needed and then add them accordingly. This prevents overfeeding and unwanted algae growth.

How does it work?

1: Use the 3 test kits developed by Colombo to measure the Nitrate (Nitro), Phosphorus (Phospho) and Iron (Ferro) levels in the aquarium water.
2: Using the test kits, regularly measure the Nitrate, Phosphate and Ferro values of the water.
3: Then add the exact amount of Colombo Nitro, Phospho and Ferro nutrition using the handy dosing pump on the bottle. 4: This keeps these 3 crucial nutrient values at the right level and your plants have perfect nutrition, without too much nutrition which encourages algae growth. It's that simple.

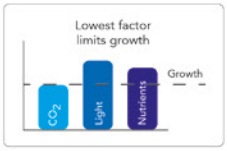

What is required for beautiful plants?

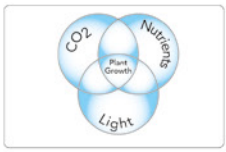

The following 3 factors must be in balance: light, CO2 and nutrition. The factor that is least available in this 3-unit will limit plant growth and thus create room for algae growth.

1: Use modern LED lighting. This provides the plants with sufficient light. Pay attention to the PAR of the lighting! We recommend PAR > 200.

2: Supply CO_2 with a CO_2 system. Use a Colombo CO_2 indicator, then you can be sure you are adding the right amount of CO_2 and also avoid wasting CO_2.

3: Proper nutrition starts with a good nutrient bed when setting up an aquarium. However, the soil mainly releases nutrients to the roots and aquarium plants get much of their nutrition from the water. This is why you add liquid plant food to the aquarium water containing Nitro (nitrogen), Phospho (phosphorus) and Ferro (iron plus). If you keep these 3 groups in the right concentration in your aquarium, your plants will be able to grow optimally.

One Floratest pack is sufficient for 40 tests!

FloraTest
Testsets.

Professional drip test for precise determination of Nitrate (Nitro), Phosphorus (Phospho) and Iron (Ferro) levels. The handy visualised instructions for use, supplied test tubes and accessories make testing easy!

FloraPlus
250 ml dosing pumps.

Besides iron, Colombo Flora Ferro contains all the other nutrients needed for good plant growth in the right ratio to iron. These include potassium, magnesium, manganese, zinc and many others

Flora NPF Testkits.

The handy visualised instructions, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

FloraTest Nitro.

Professional drip test with adapted measuring range for precise determination of nitrate value for fertilisation of aquarium plants.

Test range Nitrate 0 - 30 mg/l

COLOMBO FLORA NITRO TEST
A5010500
8715897342592

S.R.P. €13,39

FloraTest Phospho.

Professional drop test with adapted measuring range for precise determination of phosphate value for fertilising aquarium plants.

Test range Phosphate 0,2 - 1,5 mg/l

COLOMBO FLORA PHOSPHO TEST
A5010505
8715897342608

S.R.P. €15,49

FloraTest Ferro.

Professional drop test with adapted measuring range for precise determination of iron value for fertilisation of aquarium plants.

Test range Iron 0.05 - 0.75 mg/l

Flora NPF Nutrition.

FloraPlus Nitro.

Special nitrate nutrition for aquarium plants. Measure Nitrate levels with the Flora Nitro test and add Nitro nutrient as needed.

Colombo Nitro, Phospho and Ferro tests and nutrition have been developed especially for Aqua Scapers.

Add Nitrate nutrition according to the needs of the aquarium plants.

Contents: 250 ml. Dosage: 1x pumping (1,25 ml) per 25 litres of water increases Nitrate levels by 2,5 mg/l.

COLOMBO FLORA NITRO 250 ML
A5010515
8715897342622

S.R.P. €10,19

FloraPlus Phospho.

Special phosphate nutrition for aquarium plants. Measure phosphate levels with the Flora Phospho test and add Phospho nutrition as needed.

Colombo Nitro, Phospho and Ferro tests and nutrition have been developed especially for Aqua Scapers.

Add phosphate nutrition according to the needs of the aquarium plants.

Contents: 250 ml. Dosage: 1x pumping (1,25 ml) per 25 litres of water increases phosphate levels by 0.1 mg/l.

COLOMBO FLORA PHOSPHO 250 ML
A5010520

CO_2 systems.

Order refill bottles so you can continue dosing CO_2 inexpensively when the first bottle is empty.

CO_2 Basic Set.

The CO2 Basic Set prowides an easy way to add CO2 to small aquariums. Fill the diffuser with CO2 and contact with the water absorbs the CO2 gas.

- Handy CO2 basic set for small aquariums, ready to use in minutes.
- Order refill bottles from your dealer so you can continue dosing CO2 inexpensively when the first bottle is empty.
- Contents 12 grams of CO2, check the CO2 content of the aquarium water with the CO2 indicator.

COLOMBO CO2 KIT BASIC
A5010175
8715897244018
S.R.P. €14,99

CO_2 Advance Set.

The Colombo CO2 advance set consists of a pressure cylinder containing 95 grams of CO2, a pressure regulator, a 3-in-1 diffuser and all connections. The pressure regulator controls the amount of CO2 flowing into the diffuser. Inside the diffuser, the built-in bubble counter allows you to see how many CO2 bubbles are released in a given time. The diffuser produces very fine bubbles so that the CO2 gas is well absorbed by the water.

- Complete CO2 set for aquariums up to 100 litres
- With the adaptor available as an accessory, you can upgrade this set and use a large 800 or 1200-gram CO2 bottle.
- Pressure regulator with 5/8-18 UNF thread and 95g CO2 cylinder.

COLOMBO CO2 KIT ADVANCE 95 GRAM
A5010185
8715897244032
S.R.P. €118,49

CO_2 Basic Set Refill.

Colombo CO2 Basic Set refill, pressure bottle with 12 grams of CO2

- Also suitable for the Colombo CO2 basic set
- Check the CO2 content of the aquarium water with the CO2 indicator, so you know whether you are dosing enough CO2 or need to adjust the dosage.
- Contents 12 grams of CO2.

COLOMBO CO2 BASIC REFILL 12 GRAM
A5010180
8715897244025
S.R.P. €6,99

95 gram CO_2 cylinder.

CO2 cylinder for the Colombo CO2 advance set. Contents 95 grams, for 1-time use.

- Refill for Colombo CO2 Advance set
- With 5/8-18 UNF thread.
- Contents 95 grams of CO2.

COLOMBO CO2 ADVANCE CYLINDER 95 GRAM
A5010190
8715897244186
S.R.P. €19,39

Upgrade the Advance set!

We offer a variety of expansion options to adapt to different stages of an aquarium.

Start with the Colombo CO_2 Advance set.
Start with the CO_2 Advance kit, equipped with a 95-gram cylinder, Pressure regulator and 3-in-1 diffuser, which is ideal for aquariums up to 100 liters.

Stop CO_2 wastage with a Solenoid Valve.
Another recommended accessory is a Solenoid, a magnetic valve that opens and closes in combination with a standard timer. This allows you to halt the CO_2 flow at night when plants don't require it, effectively doubling the lifespan of your CO_2 cylinder.

Enhance efficiency with a CO_2 Indicator.
Enhance the the CO_2 Advance kit with various options. One such option is employing a CO_2 indicator, providing real-time monitoring of CO_2 levels in your aquarium. This ensures optimal CO_2 levels, preventing overuse and optimizing the kit's efficiency.

Upgrade with adapter ring to larger CO_2 cylinders.
Our exclusive adapter ring lets you use 800g or 1200g cylinders, extending usage time and enabling application on tanks up to 400 liters. Switching to these larger cylinders reduces change frequency, potentially saving up to 70%. Attach the ring to the regulator and screw it onto a large cylinder for enhanced efficiency.

CO_2 Adaptor.

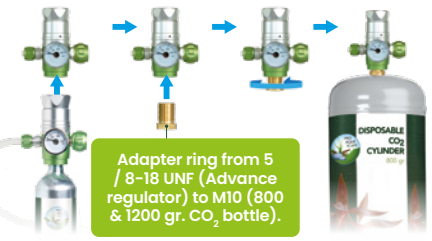

Using this adapter ring, you can use the pressure regulator of the Advance set on the 800 & 1200gram cylinder. This way, the cylinder needs to be changed less often and CO2 use is almost 70% cheaper.

COLOMBO CO2 ADAPTOR 95 -> 800&1200 GRAM
A5010200
8715897244209
S.R.P. €13,99

- Makes the Colombo Advance CO2 set suitable for the Colombo 800 or 1200 gram CO2 bottle.
- Save up to 70% on the cost of CO2 usage with our 800 and 1200g CO2 cylinders.
- Adapter from 8/8-18 UNF to M10 x 1.

Advance pressure regulator.

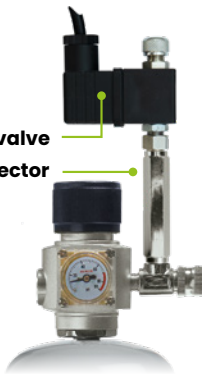

- Pressure reducer with intermediate chamber for constant CO2 release.
- Suitable for 95-gram CO2 cylinders with 5/8-18 UNF connection

COLOMBO ADVANCE CO2 PRESSURE REGULATOR
A5010312
8715897081101
S.R.P. €78,29

Solenoid valve.

As plants only absorb CO2 during the day, the supply can be stopped at night. By installing the solenoid valve, this can be done automatically using a time switch. The solenoid valve pays for itself, as you save a lot on CO2 cylinders!

- Save 50% or more CO2 with this electric solenoid valve.
- Easy to switch with a timer.
- 230 volt, 2 watts. 1.5-metre cable with RA Schuko plug. 4-6 mm connection with fixing bolt.

COLOMBO CO2 SOLENOID VALVE
A5010205
8715897244216
S.R.P. €51,49

Solenoid Connector.

Metal connecting piece to fix the solenoid valve to the profi pressure regulator.

- Connection 4/6 mm with fixation bolt.

COLOMBO CO2 SOLENOID CONNECTOR

CO_2 Reactor Pro 2L.

CO_2 Reactor Pro 2L.

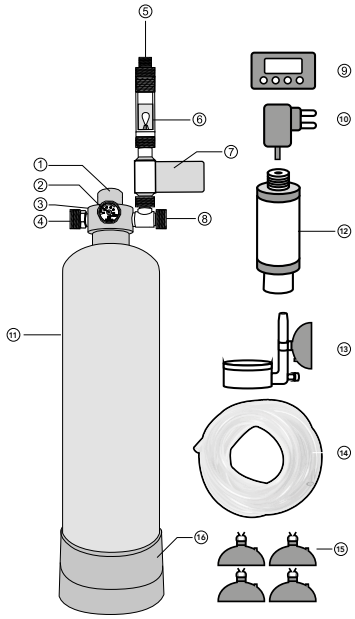

CO2 is the key nutrient for optimal plant growth. The Colombo CO2 Reactor Pro 2L is a complete set for effortlessly producing your own CO2. This set includes a stainless steel cylinder, pressure regulator, magnetic valve with timer, bubble counter, diffuser, and connectors.

Stop changing bottles! With the Colombo CO2Reactor Pro 2L, you can easily produce your own CO2. Simply combine 2 components to generate CO2. Convenient to use. Instead of having to repeatedly go out to buy or exchange pressure cylinders, you can easily refill the empty cylinder with the 2-component system yourself for CO2 production.

The reactor set includes a magnetic valve with timer to prevent CO2 waste during the night.

How does it work? Open the cylinder and add the 2-components and water, close the bottle with the pressure regulator, the chemical reaction creates about 105 grams of CO2 gas in 30 minutes. The refill is not included, buy it separately from your dealer; Colombo CO2 reactor refill-A A5010265 and refill-B A5010270.

COLOMBO CO2 PRO REACTOR KIT 2 L
A5010325
8715897304941
S.R.P. **€194,99**

CO_2 Reactor Pro 2L Parts:

1. Pressure regulator
2. Pressure gauge
3. Pressure relief valve
4. Main valve
5. Hose connector
6. Bubble counter
7. Solenoid
8. Fine adjustment knob
9. Timer
10. Ballast
11. Stainless steel cylinder
12. Moisture filter
13. CO_2 Diffuser
14. Hose
15. Hose clamp + suction cups (4x)
16. Cylinder base.

CO_2 Reactor Refill Component A.

CO_2 Reactor Refill Component B.

Refill A for the Colombo CO2 reactor, in combination with Refill B and tapwater you fill the reactor to make your own CO2.

Make your own CO2 with 2 components. No more changing pressure bottles!

Use, open the cylinder and add 200 grams of A and 200 grams of B and 300 ml of water, close the bottle with the pressure regulator, the chemical reaction creates about 105 grams of CO2 gas in 30 minutes.

Contents 1000 grams, enough for 5 refills, approximately 500 grams of CO2.

COLOMBO CO2 REACTOR REFILL A 1000 GRAM
A5010265
8715897350511
S.R.P. **€10,29**

COLOMBO CO2 REACTOR REFILL B 1000 GRAM
A5010270

CO_2 accessories.

3-in-1 CO_2 Diffusor.

With the 3 in 1 diffuser, you have a check valve, bubble counter and diffuser in one device. Available in Medium and Large models.

- 3 in 1 space-saving CO2 diffuser.
- Equipped with bubble counter for simple dosing.
- Made of crystal-clear acrylic, it has the optics of glass but is not as breakable!

COLOMBO CO2 3-1 DIFFUSER MEDIUM
A5010208
8715897245992
S.R.P. €15,49

COLOMBO CO2 3-1 DIFFUSER LARGE
A5010210
8715897244223
S.R.P. €17,29

Scaper CO_2 Diffusor.

Professional CO2 Diffuser, perfect for Aquascaping. Length 25 cm, the diffucor should be placed as deep as possible in the aquarium. Check the height of your aquarium and choose the right model.

- Made of crystal-clear acrylic with the optics of glass but not as fragile.
- Available in 25, 35 and 40 cm, with catchable diffuser available as an accessory from your dealer.

SCAPER CO2 DIFFUSER 25 CM
A5010225
8715897312564
S.R.P. €25,79

For aquaria between 35-40 cm high

SCAPER CO2 DIFFUSER 35 CM
A5010230
8715897312571
S.R.P. €27,79

For aquaria between 45-50 cm high

SCAPER CO2 DIFFUSER 40 CM
A5010235
8715897312588
S.R.P. €30,89

For aquariums between 50-60 cm high

Spare Diffusor.

SCAPER CO2 SPARE DIFFUSER
A5010237
8715897337642
S.R.P. €7,19

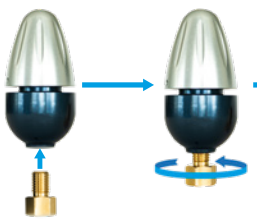

Adapter *(Dennerle)*.

The adapter ring allows you to use a pressure regulator with an M10x1.25 thread (Dennerle) on the Colombo 800 and 1200 gram CO2 bottle with an M10x1.0 connection.

- Adapter ring to make pressure regulators with an M10x1.25 thread suitable for the Colombo 800 or 1200 gram CO2 bottle.
- Dennerle and other brands uses pressure regulators with an M10x1.25 thread.

COLOMBO CO2 ADAPTOR DENNERLE 500 GRAM
A5010213
8715897306563
S.R.P. €13,39

Adapter ring from M10 x 1 (800 g / 1200 g CO2 cylinder) to M10 x 1.25

COLOMBO

For a healthy marine aquarium.

Marine.

The best brands for marine aquariums.

Our reliable dripping test for Carbonate hardness (KH), Calcium content (Ca), Magnesium content (Mg), Nitrate level (NO_3) and Phosphate level packed in a handy plastic case with a custom made interior to organise the storage of your test kits. The components from the Colombo marine test sets can be used to complement empty bottles or used materials.

Marine Test Lab Professional.

Test case with the most popular drip tests for marine water. Contains professional tests for Carbonate hardness, Calcium, Magnesium, Nitrate and Phosphate.

Complete with all necessary accessories and visualised operating instructions. Packed in sturdy plastic case.

Consumed test materials can be replenished with the loose Colombo seawater tests.

With each test, 40 tests can be done.

COLOMBO MARINE TEST LAB (KH-CA-MG-NO3-PO4)

N5060625

8715897282904

S.R.P. **€64,89**

Test the values of:

- **KH** Carbonate Hardness
- **Ca** Calcium
- **Mg** Magnesium
- **NO_3** Nitrate
- **PO_4** Phosphate

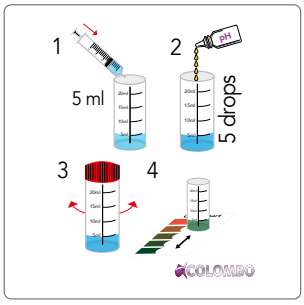

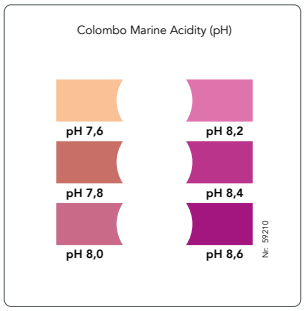

Marine Test Kits.

Correct water parameters are essential for a successful marine aquarium.

Complete range of drip tests for marine aquariums. Tests available for pH - KH - GH - Ammonia - Nitrite - Nitrate - Phosphate. With the quick test strip you can test pH - KH - GH - Nitrite - Nitrate and Chlorine value. The tests are easy to use and provide a reliable measurement result. Whichever test you choose, regular testing of the water is essential to maintain your marine aquarium.

pH Test.

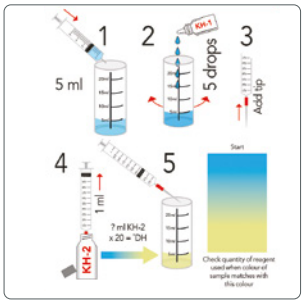

Professional drop test for precise determination of pH in seawater.

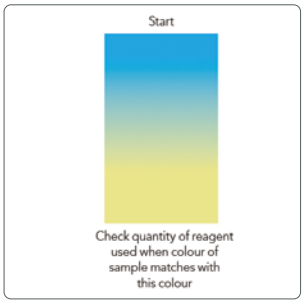

- Test range pH 7.6 - 8.6
- The contents in the pack are sufficient for 40 tests

COLOMBO MARINE PH TEST
N5060510
8715897259210

S.R.P. **€8,29**

KH Test.

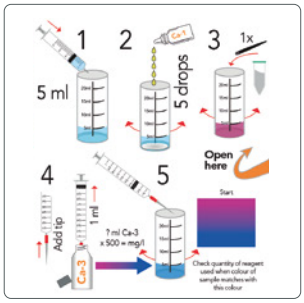

Professional drop test for precise determination of KH in seawater.

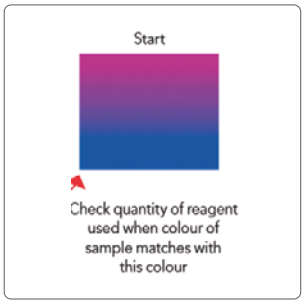

- Titration test set, simplify testing by using the Colombo test stirrer.
- The contents in the pack are sufficient for 40 tests

COLOMBO MARINE KH TEST
N5060515
8715897259227

S.R.P. **€9,99**

Calcium Test.

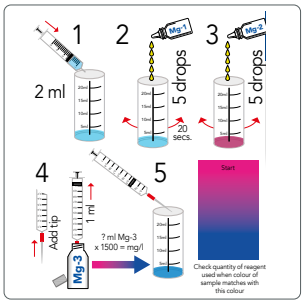

Professional drop test for precise determination of Calcium content in seawater.

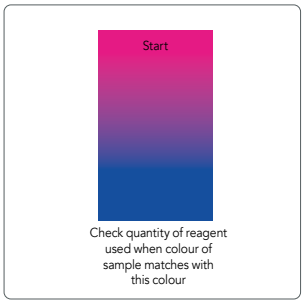

- Titration test set, simplify testing by using the Colombo test stirrer.
- Depending on the CA value, the contents of the package are on average sufficient for 40 tests

COLOMBO MARINE CALCIUM TEST
N5060540
8715897259272

S.R.P. **€14,39**

Magnesium Test.

Professional drop test for precise determination of Magnesium content in seawater.

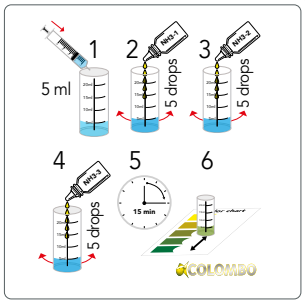

- Titration test set, simplify testing by using the Colombo test stirrer.
- Depending on the Mg value, the contents of the package are on average sufficient for 40 tests

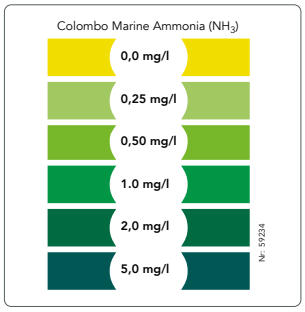

COLOMBO MARINE MAGNESIUM TEST
N5060545
8715897259289

S.R.P. **€14,39**

EASY PRECISE 40 TESTS

NH_3 Test.

Professional drop test for precise determination of ammonia levels in seawater.

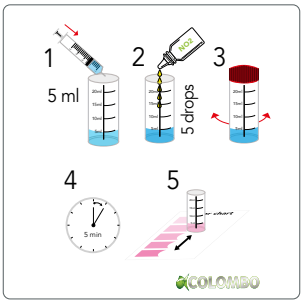

Test range ammonia: 0 - 5 mg/l

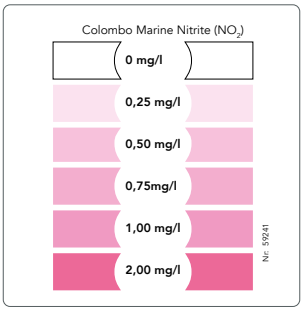

The contents in the pack are sufficient for 40 tests

COLOMBO MARINE AMMONIA TEST
N5060520
8715897259234

S.R.P.
€11,99

NO_2 Test.

Professional drop test for precise determination of nitrite levels in seawater.

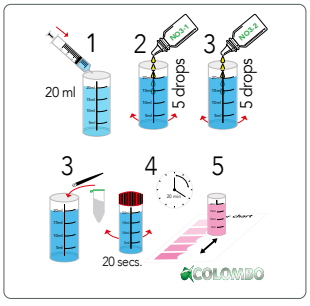

Testing range nitrite: 0 - 2 mg/l

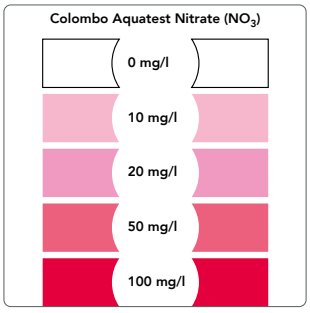

The contents in the pack are sufficient for 40 tests

COLOMBO MARINE NITRITE TEST
N5060525
8715897259241

S.R.P.
€8,49

NO_3 Test.

Professional drop test for precise determination of nitrate levels in seawater.

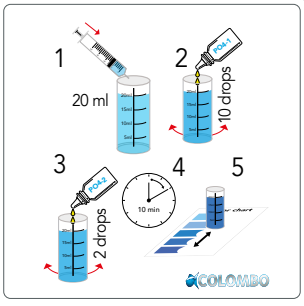

Test range Nitrate 0 - 4 mg/l

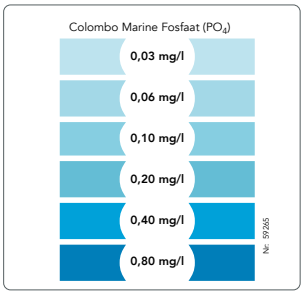

The contents in the pack are sufficient for 40 tests

COLOMBO MARINE NITRATE TEST
N5060530
8715897259258

S.R.P.
€12,39

PO_4 Test.

Professional drop test for precise determination of phosphate content in seawater.

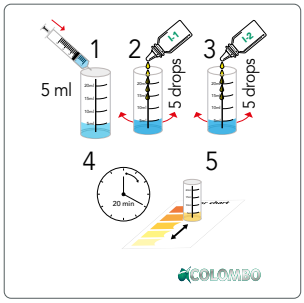

Test range Phosphate 0.03 - 0.8 mg/l

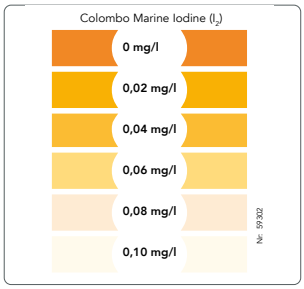

The contents in the pack are sufficient for 40 tests

COLOMBO MARINE PHOSPHATE TEST
N5060535
8715897259265

S.R.P.
€13,39

Iodine Test.

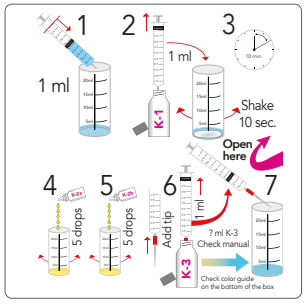

Professional drop test for precise determination of iodine levels in seawater.

Test range Iodine 0 - 0.1 mg/l

The contents in the pack are sufficient for 40 tests

COLOMBO MARINE IODINE TEST (COLOUR 1)
N5060555
8715897259302
S.R.P.
€14,99

Potassium Test.

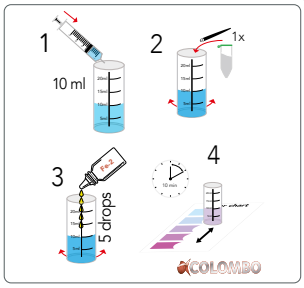

Professional drop test for precise determination of potassium levels in seawater.

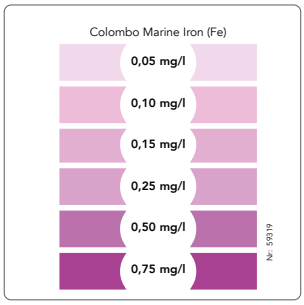

Titration test set, simplify testing by using the Colombo test stirrer.

Depending on the potassium value, the contents of the package are on average sufficient for 40 tests

COLOMBO MARINE POTASSIUM TEST (COLOUR 2)
N5060550
8715897259296
S.R.P.
€26,59

Iron Test.

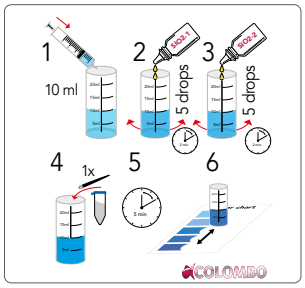

Professional drop test for precise determination of iron content in seawater.

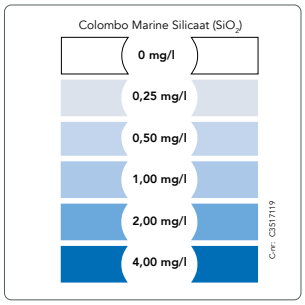

Test range Iron 0.05 - 0.75 mg/l

The contents in the pack are sufficient for 40 tests

COLOMBO MARINE IRON TEST (COLOUR 3)
N5060560
8715897259319
S.R.P.
€14,99

Silicate Test.

Professional drop test for precise determination of Silicate content in seawater.

Silicate test range: 0 - 4 mg/l

The contents in the pack are sufficient for 40 tests

COLOMBO MARINE SILICATE TEST
N5060650
8715897304989
S.R.P.
€12,89

Test Stirrer.

The test stirrer keeps the water sample moving so you have both hands free to carefully administer the reagents.

Recommended for all tests operating on the titration principle.

Indispensable tool for precision testing.

Requires 2 AA batteries (not included)

COLOMBO MARINE TEST STIRRER

Additives.

Marine Bacto.

Bacto contains a unique blend of specially selected bacteria that prowide a complete and rapid build-up of biology in the marine aquarium.

At the start, rapid biological build-up is very important to avoid problems such as algae growth as much as possible.

After starting the aquarium, add Bacto weekly for optimal biology in which fish and invertebrates thrive optimally.

COLOMBO MARINE BACTO 500 ML
N5060400
8715897258992
S.R.P. €17,29

Contents 500 ml, sufficient for starting up 250 litres

COLOMBO MARINE BACTO 1.000 ML
N5060405
8715897259005
S.R.P. €25,79

Contents 1000 ml, sufficient for starting 500 litres

KH Plus.

Liquid KH booster to maintain an optimal KH, between 8 and 12°DH. Test the KH value and add KH-plus to compensate for consumption.

This concentrated formula pro-wides the maximum KH increase without precipitation.

Ready-to-use liquid, you can dose it directly into your marine aquarium

COLOMBO MARINE KH+ 1.000 ML
N5060415
8715897259029
S.R.P. €22,69

Contents 1000 ml increases KH by 4° in 2,500 ltr

COLOMBO MARINE KH+ 500 ML
N5060410
8715897259012
S.R.P. €14,19

Contents 500 ml increases KH by 4° in 1,250 ltr

COLOMBO MARINE KH+ 2.500 ML
N5060417
8715897306471
S.R.P. €41,19

Contents 2500 ml increases KH by 4° in 6,250 ltr

Bacto Balls Dispenser.

The handy dispenser allows easy application of the Bacto Balls and easy removal of residues from the aquarium after use.

This dispenser is specially designed for use together with Colombo bacto balls.

You easily mount and remove the dispenser in your sump or aquarium with the suction cups prowided

Suitable for aquariums up to 200 litres, mount multiple dispensers in larger aquariums.

COLOMBO MARINE BACTO BALL DISPENSER
N5060640
8715897287770
S.R.P. €7,19

Bacto Balls.

Colombo bacto balls contain a unique blend of specially selected bacteria that prowide complete and stable biology in the marine aquarium.

The special bio polymer balls ensure even release.

Use the Colombo Bacto Ball dispenser for easy use (N5060640).

COLOMBO MARINE BACTO BALLS 500 ML
N5060630
8715897287756
S.R.P. €26,59

500 ml, sufficient for 100 litres of water for 40 weeks.

COLOMBO MARINE BACTO BALLS 1.000 ML
N5060635
8715897287763
S.R.P. €37,89

1000 ml, sufficient for 200 litres of water for 40 weeks.

KH Plus Powder.

KH powder booster to maintain an optimum KH, between 8 and 12°DH. Test the KH value and add KH-plus to compensate for consumption.

This concerns the economical powder form. With this, a stock solution can be made to maintain KH levels very economically.

Contains high-quality, high-purity ingredients for efficient and safe use.

Contents 1000 ml = approx. 1.3 kg. Increases the KH value by 4°DH in 10,000 litres of water.

COLOMBO MARINE KH+ POWDER 1.000 ML
N5060420
8715897259036
S.R.P. €22,69

Additives.

Calcium Plus.

Liquid Calcium addition to maintain an optimum value, between 410 and 440 mg/l. Test the Calcium value and add Calcium plus to compensate for consumption.

NATURAL Ca SEA WATER | +175 mg 1.000 L | STRONTIUM BARIUM

Contains ingredients extracted from natural seawater by solar evaporation! This offers great advantages over products using chemical or mined raw materials

COLOMBO MARINE CALCIUM+ 1.000 ML
N5060430
8715897259050
S.R.P. €23,69

Ready-to-use liquid to add Calcium, it can be added directly to seawater.

Contents 1000 ml, increases Calcium content by 50 mg/l in 1000 litres of water.

COLOMBO MARINE CALCIUM+ 500 ML
N5060425
8715897259043
S.R.P. €14,19

Contents 500 ml, increases Calcium content by 50 mg/l in 500 litres of water.

COLOMBO MARINE CALCIUM+ 2.500 ML
N5060433
8715897306488
S.R.P. €41,19

Contents 2500 ml, increases Calcium content by 50 mg/l in 2500 litres of water.

Magnesium Plus.

Liquid Magnesium addition to maintain an optimum value, between 1250 and 1300 mg/l. Test the Magnesium value and add Magnesium plus to compensate for consumption.

NATURAL Mg SEA WATER | +50 mg 500 L | HEALTHY CORALS

Ready-to-use liquid to add magnesium, it can be added directly to seawater.

COLOMBO MARINE MAGNESIUM+ 500 ML
N5060440
8715897259074
S.R.P. €14,19

Contents 500 ml, increases Magnesium content by 175 mg/l in 500 litres of water.

Contains ingredients extracted from natural seawater by solar evaporation! This offers great advantages over products using chemical or mined raw materials

COLOMBO MARINE MAGNESIUM+ 1.000 ML
N5060445
8715897259081
S.R.P. €23,69

Contents 1000 ml, increases Magnesium content by 175 mg/l in 1000 litres of water.

Calcium Plus Powder.

Powder Calcium addition to maintain an optimum value, between 410 and 440 mg/l. Test the Calcium value and add Calcium plus to compensate for consumption.

NATURAL Ca SEA WATER | +175 mg 1.000 L | STRONTIUM BARIUM

This concerns the economical powder form. This can be used to make a stock solution to maintain calcium levels very economically.

Contains ingredients extracted from natural seawater by solar evaporation! This offers great advantages over products using chemical or mined raw materials

Contents 1000 ml = approx. 1.0 kg. Increases the calcium content by 115 mg/l in 1000 litres of water

COLOMBO MARINE CALCIUM+ POWDER 1 L
N5060435
8715897259067
S.R.P. €23,69

Magnesium Plus Powder.

Powder Magnesium addition to maintain an optimum value, between 1250 and 1300 mg/l. Test the Magnesium value and add Magnesium plus to compensate for consumption.

NATURAL Mg SEA WATER | +50 mg 500 L | HEALTHY CORALS

This concerns the economical powder form. With this, a stock solution can be made to maintain magnesium levels very economically.

Contains ingredients extracted from natural seawater by solar evaporation! This offers great advantages over products using chemical or mined raw materials

Contents 1000 ml = approx. 1.3 kg. Increases the magnesium content by 250 mg/l in 250 litres of water

COLOMBO MARINE MAGNESIUM+ POWDER 1 L
N5060450
8715897259098
S.R.P. €23,69

Adding or removing nitrate and phosphate.

Nitrate Ex.

Nitrate Ex is a nutrient for bacteria in marine water that can break down nitrate. By adding Nitrate Ex, Nitrate is broken down efficiently and naturally.

80 DAYS 125 LTR | NITRATE REDUCTION | LIVING BACTERIA

Bacteria that break down nitrate cannot develop properly without Nitrate Ex.After a few weeks, the bacterial colony is sufficiently developed and you will be able to observe a clear reduction in nitrate.

COLOMBO MARINE ALGAE NITRATE EX 1.000 ML
N5060460
8715897259111
S.R.P. €21,99

Contents 1000 ml, sufficient to treat 500 litres of water for 40 days.

Daily dosing, the use of a dosing pump is recommended.

COLOMBO MARINE ALGAE NITRATE EX 500 ML
N5060455
8715897259104
S.R.P. €12,99

Contents 500 ml, sufficient to treat 250 litres of water for 40 days.

COLOMBO MARINE ALGAE NITRATE EX 2.500 ML
N5060463
8715897306495
S.R.P. €39,69

Capacity 2500 ml, sufficient to treat 625 litres of water for 80 days.

Phosphate Ex.

Phosphates in seawater are easily removed with Phosphate Ex.

REMOVES 2.500 mg | PHOSPHATE REMOVAL | IMMEDIATE REMOVAL

With one dose, the desired amount of phosphate can be removed immediately.

Our unique formula offers unparalleled results.

COLOMBO MARINE ALGAE PHOSPHATE EX 500 ML
N5060465
8715897259128
S.R.P. €15,29

Contents 500 ml, sufficient to remove 2,500 mg of phosphate.

COLOMBO MARINE ALGAE PHOSPHATE EX 1.000 ML
N5060470
8715897259135
S.R.P. €23,69

Contents 1000 ml, sufficient to remove 5000 mg of phosphate.

Nitrate Plus.

Nitrate Plus is a ready-to-use liquid to replenish nitrate levels in marine water.

+2 mg 50.000 LTR | INCREASE NITRATE | STRONG GROWTH

In aquaria with very large numbers of corals, nitrate deficiency can occur, which can be easily supplemented with Nitrate Plus.

Powerful formula

COLOMBO MARINE NITRATE PLUS 500 ML
N5060595
8715897273568
S.R.P. €12,99

Contents 500 ml, sufficient to increase nitrate levels by 1 mg/l in 500 litres of water.

COLOMBO MARINE NITRATE PLUS 1.000 ML
N5060600
8715897273575
S.R.P. €22,19

Contents 1000 ml, sufficient to increase nitrate levels by 1 mg/l in 1000 litres of water.

Phosphate Plus.

Phosphate Plus is a ready-to-use liquid to replenish phosphate levels in seawater.

+0,1 mg 50.000 LTR | INCREASE PHOSPHATE | STRONG GROWTH

In aquaria with very large numbers of corals, phosphate deficiency can occur, which can be easily supplemented with Phosphate Plus.

Powerful formula

COLOMBO MARINE PHOSPHATE PLUS 500 ML
N5060605
8715897273582
S.R.P. €12,99

Contents 500 ml, sufficient to increase phosphate levels by 0.1 mg/l in 500 litres of water.

COLOMBO MARINE PHOSPHATE PLUS 1.000 ML
N5060610
8715897273599
S.R.P. €21,99

Contents 1000 ml, sufficient to increase phosphate levels by 0.1 mg/l in 1000 litres of water.

Optimize colours..

Halo Complex.

Iodine addition for seawater.

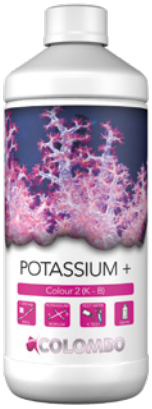

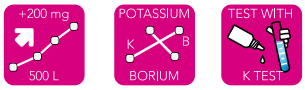

- Colour-1 is iodine-based, but also contains 2 other so-called halogens, namely bromine and fluorine.
- Especially important for pink colour development.
- Contents 500 ml, increased iodine content by 3 mg in 500 litres of water.

COLOMBO MARINE COLOUR 1 HALO COMPLEX (I-F) 500 ML
N5060475
8715897259142
S.R.P. €12,99

Potassium Plus.

Potassium additive for seawater.

- Colour-2 is potassium-based, but also contains the element Boron.
- Especially important for pink colour development.
- Contents 500 ml, increased potassium content by 200 mg in 500 litres of water.

COLOMBO MARINE COLOUR 2 POTASSIUM+ (K-B) 500 ML
N5060480
8715897259159
S.R.P. €12,99

Metals Plus.

Iron addition for seawater.

- Colour-3 is iron-based, but also contains the many other trace elements such as manganese, cobalt and nickel.
- Especially important for the development of yellow and green colours.
- Contents 500 ml, increased Iron content by 2 mg in 500 litres of water.

COLOMBO MARINE COLOUR 3 METALS 500 ML (FE)
N5060485
8715897259166
S.R.P. €12,99

Coral Vits.

Liquid additive with vitamins and trace elements for marine water.

Corals get most of their nutrition from the algae they live in symbiosis with, the zooxanthellen, but this is usually not enough for optimal growth. There are also corals that do not contain zooxanthellen, such as gorgonians. So these types of corals have to get almost all their nutrition from the surrounding water.

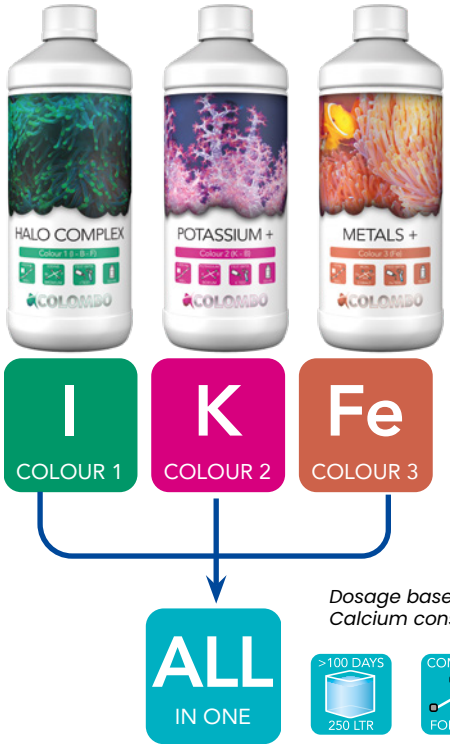

Colombo Coral Vits prowides corals with extra nutrition, it contains nutrients such as vitamins and amino acids.

COLOMBO MARINE CORAL VITS 500 ML
N5060495
8715897259180
S.R.P. €14,19

Contents 500 ml, sufficient to treat 250 litres of water for a period of 100 days.

COLOMBO MARINE CORAL VITS 1.000 ML
N5060497
8715897284540
S.R.P. €23,69

Contents 1000 ml, sufficient to treat 500 litres of water for a period of 100 days.

All in One.

Complete all-in-one additive for trace elements in seawater.

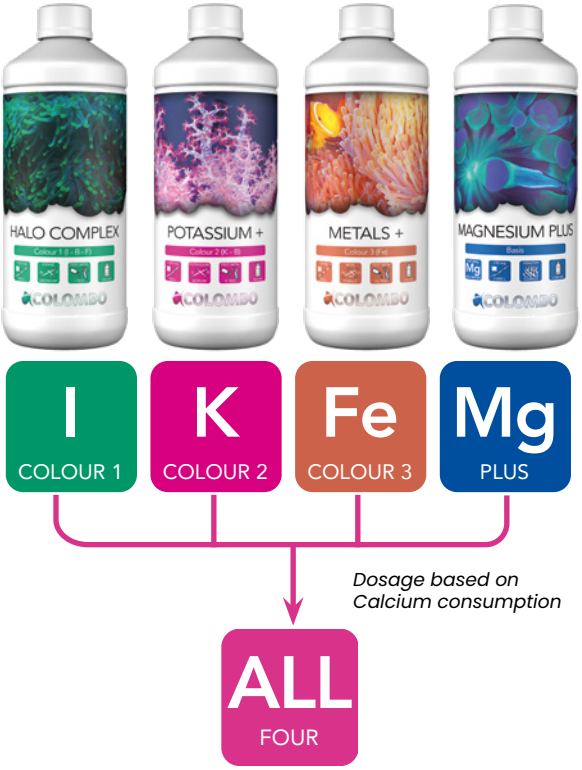

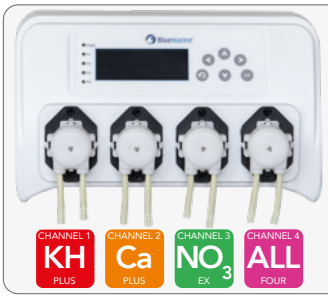

The typical colour splendour of corals only comes to fruition when all trace elements are sufficiently present in the water.With Colombo All in One, controlled trace elements such as potassium, iodine and iron can be added.

Measure only the calcium value, based on this value the trace elements can be added in a controlled way.

COLOMBO MARINE COLOUR ALL IN ONE 500 ML
N5060490
8715897259173
S.R.P. €14,19
Contents 500 ml, sufficient to treat 250 litres of water for a period of 100 days.

COLOMBO MARINE COLOUR ALL IN ONE 1.000 ML
N5060492
8715897284533
S.R.P. €22,99
Contents 1000 ml, sufficient to treat 500 litres of water for a period of 100 days.

Easy maintenance with the Colombo All4 system on a 4-channel dosing pump.

Channel 1: Colombo KH Plus
Channel 2: Colombo Calcium Plus
Channel 3: Colombo Nitrate Ex
Channel 4: Colombo All Four

All Four.

Combined additive for use with the Colombo All Four care system for marine aquariums.

NATURAL Mg SEAWATER
IODINE + POTASSIUM
MICRO ELEMENTS

Colombo All Four contains Magnesium and numerous elements important for optimal colouration such as Potassium, Iron, Iodine, etc.

Use together with Colombo KH+, CA+ and Nitrate Ex. Dosing using a 4-channel dosing pump is recommended.

COLOMBO MARINE ALL FOUR 500 ML
N5060665
8715897305016
S.R.P. €14,19
Contents 500 ml. Dosage based on Calcium consumption.

COLOMBO MARINE ALL FOUR 1.000 ML
N5060670
8715897306501
S.R.P. €22,69
Contents 1000 ml. Dosage based on Calcium consumption.

COLOMBO MARINE ALL FOUR 2.500 ML
N5060675
8715897306518
S.R.P. €41,19
Contents 2500 ml. Dosage based on Calcium consumption.

Pro Reef Salt & Marine Sand.

The use of Colombo Pro Reef salt and the Colombo additives are highly recommended by experts and professionals.

Pro Reef Salt.

Colombo Pro Reef Salt is extracted from the coral sea and therefore contains trace elements in the same proportions as in the sea.Many hobbyists subscribe to the benefits of a natural product, which is why experts wholeheartedly recommend using Reef Pro salt. Dissolves easily without residue. For a healthy and successful marine aquarium, we recommend weekly water changes of 5-10%.

Because of its origin, Colombo Pro Reef Salt differs greatly from most other marine aquarium salts. At least 85% of the ingredients are derived from natural seawater and extracted by natural evaporation.

During the evaporation of seawater, bacteria spores remain on the salt, these spores improve biology. Together with the balanced formula and pure ingredients, 95% of Pro Reef salt users see a significant improvement in coral development.

Seawater made with Pro Reef contains at a salinity of 25ppt, specific gravity 1024-1026 with the following values: KH:9, Calcium:420, Magnesium:1370, Potassium:400, Strontium:10 mg/l.

Mycosidol®.

Product for a clean marine aquarium without cyano algae.

120 ML | 4 x 450 L 1800 LITERS

Mycosidol Bio Cure contains natural ingredients and bacteria that purify the water and break down organic contaminants called detritus. Red algae also known as Cyanos develop mainly in aquariums where a lot of detritus is present.

Applying Mycosidol as a cure can effectively stop Cyanos formation. In addition, Mycosidol can be applied periodically to prevent accumulation of organic pollutants.

120 ml sufficient to treat 450 litres of water.

COLOMBO MARINE MYCOSIDOL 120 ML/450 L

S.R.P. **€20,99**

Aiptasidol®.

Aiptasidol is a specially developed liquid that easily removes unwanted Aiptasia.

±500 x | 100 ml

Aiptasia (glass anemones) can develop explosively and thus become a pest.

Target treatment, so no negative effects on water quality.

One pack can be used for 500 treatments.

Cobrasal®.

Non-reef safe medication skin against parasites in marine fish such as: Ichtyophthirius, Oodinum, Cryptocaryon.

2.500 LTR | FISH ONLY | NOT REEF SAFE

Highly effective treatment for fish that can be treated outside the reef aquarium.

This powerful medication contains copper sulphate, among other ingredients, and is therefore not safe for use in an aquarium with corals and/or other invertebrates.

Contents 500ml, sufficient to treat 2,500 litres of water.

COLOMBO MARINE COBRASAL 500ML/2.500L*
N5060620
8715897273612
S.R.P. **€22,69**

Femsal®.

Reef safe medication effective against skin parasites in marine fish such as Oödinium, Cryptocaryon and others.

2.500 LTR | EXPERTS CHOICE | REEF SAFE

Symptoms of infected fish vary by parasite, from white dots or spots to a drab pale colour and skin.

This treatment is safe for the reef when used correctly and can therefore be used in a mixed aquarium with invertebrates

COLOMBO MARINE FEMSAL 500 ML/2.500 L*
N5060615
8715897273605
S.R.P. **€23,69**

Contents 500ml, sufficient to treat 2,500 litres of water.

COLOMBO MARINE FEMSAL 2.500 ML/12.500 L*
N5060617
8715897336232
S.R.P. **€75,69**

Capacity 2,500ml, sufficient to treat 12,500 litres of water.

Silicate Ex.

Special filter material for silicate removal.

HIGH CAPACITY | SILICATE REMOVAL | QUICK ACTION

Excessive levels of silicate, or silica, are the main reason for the presence of diatoms (brown algae). By using Silicate Ex to remove the silicate, the algae can no longer grow and disappear.

Ideal for use in a reactor.

COLOMBO MARINE SILICATE EX 500 ML
N5060655
8715897304996
S.R.P. **€23,69**

Contents 500 ml, use 100 ml per 200 litres of water.

COLOMBO MARINE SILICATE EX 1.000 ML
N5060660
8715897305009
S.R.P. **€39,99**

Contents 1000 ml, use 100 ml per 200 litres of water.
