

Bactoplus®

Bacteria for healthy water.

BactoPlus

The best brands for ponds.

The formula for the best water quality.

Colombo BactoPlus offers a wide range of products to keep your pond and fish healthy. Whether it's filter starters, maintenance gels, or health-enhancing additives, each product is designed to improve water quality and solve specific pond-related problems. Discover below which product works best for each situation!

BactoPlus was the winner in an independent test by NVN and KIWA Water Research. Of the 18 tested products, BactoPlus Gel contained by far the most AOB and NOB bacteria, essential for pond filters, with 120 million bacteria per ml. Only 6 products met the requirements, and BactoPlus was rated number 1 due to its high count and the correct types of bacteria.

Starting and maintaining filters:

Filter Start & Filter Start Gel

These products are essential for starting new filters, after maintenance, and when there are water quality issues. They contain high counts of living AOB (*ammonium-oxidizing bacteria*) and NOB (*nitrite-oxidizing bacteria*) that convert ammonia and nitrite into nitrate, which is crucial for a healthy pond! The Gel variant can be applied directly to the filter material for better effectiveness. **Use these products to quickly build a stable and healthy filter.**

For improved biology:

Activator Gel

The Gel contains natural minerals, trace elements, and nutrients that enhance the performance of bacteria. This product improves water quality and reduces algae growth naturally. Ideal for maintenance in existing ponds and when starting up where bacteria have already been added. **Combine Filter Start with Activator Gel for optimal results.**

Removing organic waste:

BSO Sludge Buster:

These heterotrophic bacteria break down organic waste such as sludge and debris in the pond and filter. Regular use prevents sludge buildup and maintains the biofilm in the filter. This **product is ideal for maintaining a clean and healthy pond bottom.**

Recovery and health of fish:

Lacto Health

Lacto Health is a probiotic that supports fish health with lactic acid bacteria and enzymes. It promotes wound healing, reduces pathogens, and improves overall water quality. **Use Lacto Health during fluctuations in water temperature or in disease-prone periods to keep your fish healthy.**

Optimizing water quality:

Fresh PSB

PSB improves water quality by breaking down organic material without using oxygen. They work with light, making them perfect for combining with other bacterial products. This results in an optimal living environment for your fish without negative interactions with other bacteria.

Stimulating color and health:

PSB Food Spray

This spray contains carotene and astaxanthin, natural color enhancers that promote the growth, health, and color of your fish. Spray daily over the food for the best results. This product is rich in nutritious amino acids and powerful antioxidants.

Clarity, cleaning, and filter performance:

Ohmizu

Inspired by the pure mountain water from the Japanese Niigata region, Ohmizu optimizes pond water by adding valuable minerals and reducing pollutants. It improves filter performance and ensures crystal-clear, healthy water that is essential for the proper development of Koi.

Bacteria for clear water.

Filter Start.

BactoPlus Filter Start for starting and maintaining the bacteria life in pond filters.

Test winner and the choice of koi enthusiasts for many years. Contains over 8 million bacteria per milliliter for optimal effect.

Use Filter Start at start-up, after maintenance and in case of water quality problems.

Filter Start Gel.

BactoPlus Filter Start for starting and maintaining the bacteria life in pond filters.

Apply the gel to the filter media in the filter, this ensures colonisation of bacteria in the right place. Contains over 8 million bacteria per millilitre for optimal effect.

Use Filter Gel Start at start-up, after maintenance and in case of water quality problems.

Activator Gel.

Activator is an ideal maintenance product, the increased performance of bacteria optimises water quality and naturally prevents algae growth.

Biocatalyst, contains plant nutrients for bacteria.

Use Bactoplus Activator in combination with Filter Start or Filter Start Gel, the unique plant extracts turbocharge the purification bacteria and thus ensure optimal biology.

BSO-Sludge Buster.

The Heterotrophic bacteria in BSO Sludge Buster naturally break down organic material, e.g. silt at the bottom of the pond, in the filter, and the dust layer that forms on underwater plants.

Ideal maintenance product, this prevents problems, ensures a clean bottom and filter.

Maintains the bio-film in the biological filter.

Fresh PSB.

Fresh PSB (Photo Synthetic Bacteria) are able to digest large amounts of organic matter, ensuring superior water quality.

A higher dose is not harmful and accelerates results!

No dyes

Natural

No conservatives

Fresh PSB is freshly produced in the Netherlands, 100% natural, without dyes.

PSB bacteria work without oxygen and can therefore also be added in higher doses for accelerated results.

Contents: 2,000 ml sufficient for 200,000 litres of pond water.

Ohmizu: the secret from Japan for fantastic water!

Bactoplus Ohmizu makes your pond water optimal for keeping Koi. Bactoplus analysed water from Niigata, the birthplace of Koi, and developed Ohmizu. The result is crystal clear and healthy water, rich in minerals essential for the proper development of your Koi.

With Ohmizu, valuable minerals are added to the water, contaminants are absorbed and the special Bactoplus bacteria added to the product improve filter performance, remove sludge and organic pollutants.

One of the secrets to breeding top koi is the water. With Bactoplus Ohmizu, the ideal water quality and composition for koi can be achieved.
